

ABCC1 Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP6596b**Specification**

ABCC1 Antibody (C-term) Blocking Peptide - Product InformationPrimary Accession [P33527](#)**ABCC1 Antibody (C-term) Blocking Peptide - Additional Information**

Gene ID 4363

Other Names

Multidrug resistance-associated protein 1, ATP-binding cassette sub-family C member 1, Leukotriene C(4) transporter, LTC4 transporter, ABCC1, MRP, MRP1

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP6596b](/products/AP6596b) was selected from the C-term region of human ABCC1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ABCC1 Antibody (C-term) Blocking Peptide - Protein InformationName ABCC1 ([HGNC:51](#))

Synonyms MRP, MRP1

Function

Mediates export of organic anions and drugs from the cytoplasm (PubMed:[10064732](http://www.uniprot.org/citations/10064732), PubMed:[11114332](http://www.uniprot.org/citations/11114332), PubMed:[16230346](http://www.uniprot.org/citations/16230346), PubMed:[7961706](http://www.uniprot.org/citations/7961706), PubMed:[9281595](http://www.uniprot.org/citations/9281595)). Mediates ATP-dependent transport of glutathione and glutathione conjugates, leukotriene C4, estradiol-17-beta-o-glucuronide, methotrexate, antiviral drugs and other xenobiotics (PubMed:[10064732](http://www.uniprot.org/citations/10064732), PubMed:[10064732](http://www.uniprot.org/citations/10064732)).

[11114332](http://www.uniprot.org/citations/11114332), PubMed:<[16230346](http://www.uniprot.org/citations/16230346)>, PubMed:<[7961706](http://www.uniprot.org/citations/7961706)>, PubMed:<[9281595](http://www.uniprot.org/citations/9281595)>). Confers resistance to anticancer drugs by decreasing accumulation of drug in cells, and by mediating ATP- and GSH-dependent drug export (PubMed:<[9281595](http://www.uniprot.org/citations/9281595)>). Hydrolyzes ATP with low efficiency (PubMed:<[16230346](http://www.uniprot.org/citations/16230346)>). Catalyzes the export of sphingosine 1-phosphate from mast cells independently of their degranulation (PubMed:<[17050692](http://www.uniprot.org/citations/17050692)>). Participates in inflammatory response by allowing export of leukotriene C4 from leukotriene C4-synthesizing cells (By similarity). Mediates ATP- dependent, GSH-independent cyclic GMP-AMP (cGAMP) export (PubMed:<[36070769](http://www.uniprot.org/citations/36070769)>). Thus, by limiting intracellular cGAMP concentrations negatively regulates the cGAS-STING pathway (PubMed:<[36070769](http://www.uniprot.org/citations/36070769)>).

Cellular Location

Cell membrane; Multi-pass membrane protein {ECO:0000255|PROSITE-ProRule:PRU00441, ECO:0000269|PubMed:16230346}

Tissue Location

Lung, testis and peripheral blood mononuclear cells

ABCC1 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

ABCC1 Antibody (C-term) Blocking Peptide - Background

ABCC1 is a member of the superfamily of ATP-binding cassette (ABC) transporters. ABC proteins transport various molecules across extra- and intra-cellular membranes. ABC genes are divided into seven distinct subfamilies (ABC1, MDR/TAP, MRP, ALD, OABP, GCN20, White). This full transporter is a member of the MRP subfamily which is involved in multi-drug resistance. This protein functions as a multispecific organic anion transporter, with oxidized glutathione, cysteinyl leukotrienes, and activated aflatoxin B1 as substrates. This protein also transports glucuronides and sulfate conjugates of steroid hormones and bile salts.
