

**Anti-Human AITRL Antibody**  
Catalog # ABG10008

**Specification**

---

**Anti-Human AITRL Antibody - Product Information**

Application	<b>WB, IHC, E</b>
Reactivity	<b>Human</b>
Host	<b>Rabbit</b>
Clonality	<b>Polyclonal</b>

**Anti-Human AITRL Antibody - Additional Information**

**Preparation**

Produced from sera of rabbits pre-immunized with highly pure (>98%) recombinant hAITRL. Anti-Human AITRL specific antibody was purified by affinity chromatography employing immobilized hAITRL matrix.

**WesternBlot**

To detect hAITRL by Western Blot analysis this antibody can be used at a concentration of 0.1 - 0.2 µg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant hAITRL is 1.5 - 3.0 ng/lane, under either reducing or non-reducing conditions.

**Sandwich**

To detect hAITRL by sandwich ELISA (using 100 µl/well antibody solution) a concentration of 0.5 - 2.0 µg/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems&apos; Biotinylated Anti-Human AITRL (60-055BT) as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant hAITRL.

**Immunohistochemistry**

This antibody stained A-431 cells. The primary antibody was incubated at 3.0 µg/ml overnight at 4°C followed by a fluorescent labeled secondary antibody. Optimal concentrations and conditions may vary. Information courtesy of the Cell Profiling group, SciLifeLab Stockholm.

**Formulation**

A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

**Reconstitution**

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

**Storage**

-20°C

**Precautions**

Anti-Human AITRL Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**Anti-Human AITRL Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.
