

## Anti-SMAD1/SMAD5 Picoband Antibody

Catalog # ABO10105

## **Specification**

# **Anti-SMAD1/SMAD5 Picoband Antibody - Product Information**

Application WB
Primary Accession Q15797
Host Rabbit

Reactivity Human, Mouse, Rat

Clonality Polyclonal Lyophilized

**Description** 

Rabbit IgG polyclonal antibody for SMAD1/SMAD5 detection. Tested with WB in Human; Mouse; Rat.

#### Reconstitution

Add 0.2ml of distilled water will yield a concentration of 500ug/ml.

## Anti-SMAD1/SMAD5 Picoband Antibody - Additional Information

**Gene ID 4086** 

### **Other Names**

Mothers against decapentaplegic homolog 1, MAD homolog 1, Mothers against DPP homolog 1, JV4-1, Mad-related protein 1, SMAD family member 1, SMAD 1, Smad1, hSMAD1, Transforming growth factor-beta-signaling protein 1, BSP-1, SMAD1, BSP1, MADH1, MADR1

### **Application Details**

Western blot, 0.1-0.5 µg/ml<br>

## **Subcellular Localization**

Cytoplasm.

# **Tissue Specificity**

Ubiquitous. Highest expression seen in the heart and skeletal muscle.

#### Contents

Each vial contains 4mg Trehalose, 0.9mg NaCl, 0.2mg Na<sub>2</sub>HPO<sub>4</sub>, 0.05mg NaN<sub>3</sub>.

### **Immunogen**

A synthetic peptide corresponding to a sequence of human SMAD1/SMAD5 (KRLLGWKQGDEEEKWAEKAVDALVKKLKKKKGAMEELEK).

### **Cross Reactivity**

No cross reactivity with other proteins.

Storage

At -20°C; for one year. After r°Constitution, at 4°C; for one month. It°Can also be aliquotted and stored frozen at -20°C; for a

longer time. Avoid repeated freezing and thawing.

# Anti-SMAD1/SMAD5 Picoband Antibody - Protein Information

Name SMAD1

Synonyms BSP1, MADH1, MADR1

#### **Function**

Transcriptional modulator that plays a role in various cellular processes, including embryonic development, cell differentiation, and tissue homeostasis (PubMed:<a

href="http://www.uniprot.org/citations/9335504" target=" blank">9335504</a>). Upon BMP ligand binding to their receptors at the cell surface, is phosphorylated by activated type I BMP receptors (BMPRIs) and associates with SMAD4 to form a heteromeric complex which translocates into the nucleus acting as transcription factor (PubMed: <a

href="http://www.uniprot.org/citations/33667543" target=" blank">33667543</a>). In turn, the hetero-trimeric complex recognizes cis-regulatory elements containing Smad Binding Elements (SBEs) to modulate the outcome of the signaling network (PubMed:<a

href="http://www.uniprot.org/citations/33667543" target=" blank">33667543</a>).

SMAD1/OAZ1/PSMB4 complex mediates the degradation of the CREBBP/EP300 repressor SNIP1. Positively regulates BMP4-induced expression of odontogenic development regulator MSX1 following IPO7-mediated nuclear import (By similarity).

#### **Cellular Location**

Cytoplasm. Nucleus Note=Cytoplasmic in the absence of ligand. Migrates to the nucleus when complexed with SMAD4 (PubMed:15647271). Co-localizes with LEMD3 at the nucleus inner membrane (PubMed:15647271). Exported from the nucleus to the cytoplasm when dephosphorylated (By similarity) {ECO:0000250|UniProtKB:P70340, ECO:0000269|PubMed:15647271}

### **Tissue Location**

Ubiquitous. Highest expression seen in the heart and skeletal muscle

# Anti-SMAD1/SMAD5 Picoband Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
