

Anti-CDC5L Antibody
Catalog # ABO11429**Specification****Anti-CDC5L Antibody - Product Information**

Application	WB
Primary Accession	Q99459
Host	Rabbit
Reactivity	Human, Rat
Clonality	Polyclonal
Format	Lyophilized

Description

Rabbit IgG polyclonal antibody for Cell division cycle 5-like protein(CDC5L) detection. Tested with WB in Human;Rat.

Reconstitution

Add 0.2ml of distilled water will yield a concentration of 500ug/ml.

Anti-CDC5L Antibody - Additional Information

Gene ID 988

Other Names

Cell division cycle 5-like protein, Cdc5-like protein, Pombe cdc5-related protein, CDC5L, KIAA0432, PCDC5RP

Calculated MW

92251 MW KDa

Application Details

Western blot, 0.1-0.5 µg/ml, Human, Rat

Subcellular Localization

Nucleus . Nucleus speckle . Cytoplasm . May shuttle between cytoplasm and nucleus. .

Tissue Specificity

Ubiquitously expressed in both fetal and adult tissues. .

Protein Name

Cell division cycle 5-like protein

Contents

Each vial contains 5mg BSA, 0.9mg NaCl, 0.2mg Na₂HPO₄, 0.05mg Thimerosal, 0.05mg NaN₃.

Immunogen

A synthetic peptide corresponding to a sequence at the C-terminus of human CDC5L(782-802aa KELQHRYADLLLEKETLKSFK), different from the related rat and mouse sequences by four amino acids.

Purification

Immunogen affinity purified.

Cross Reactivity

No cross reactivity with other proteins

Storage

At -20°C for one year. After r°Constitution, at 4°C for one month. It°Can also be aliquotted and stored frozen at -20°C for a longer time.Avoid repeated freezing and thawing.

Sequence Similarities

Belongs to the CEF1 family.

Anti-CDC5L Antibody - Protein Information

Name CDC5L

Synonyms KIAA0432, PCDC5RP

Function

DNA-binding protein involved in cell cycle control. May act as a transcription activator. Plays a role in pre-mRNA splicing as core component of precatalytic, catalytic and postcatalytic spliceosomal complexes (PubMed: 11991638, PubMed: 20176811, PubMed: 28076346, PubMed: 28502770, PubMed: 29301961, PubMed: 29360106, PubMed: 29361316, PubMed: 30705154, PubMed: 30728453). Component of the PRP19-CDC5L complex that forms an integral part of the spliceosome and is required for activating pre-mRNA splicing. The PRP19-CDC5L complex may also play a role in the response to DNA damage (DDR) (PubMed: 20176811). As a component of the minor spliceosome, involved in the splicing of U12- type introns in pre-mRNAs (Probable).

Cellular Location

Nucleus. Nucleus speckle. Cytoplasm Note=May shuttle between cytoplasm and nucleus

Tissue Location

Ubiquitously expressed in both fetal and adult tissues.

Anti-CDC5L Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

Anti-CDC5L Antibody - Background

Cell division cycle 5-like protein, also called PCDC5RP or CDC5-like, is a protein that in humans is encoded by the CDC5L gene. The CDC5L gene was mapped to chromosome 6p21 by fluorescence in situ hybridization. This DNA-binding protein involved in cell cycle control. It may act as a transcription activator. The Component of the PRP19-CDC5L complex forms an integral part of the spliceosome and is required for activating pre-mRNA splicing. The role of CDC5(Polo-like kinase) in regulating Rho1 is likely to be relevant to cytokinesis and asymmetric cell division in other organisms.
