

**Anti-ARA9 Picoband Antibody**  
Catalog # ABO11763**Specification**

---

**Anti-ARA9 Picoband Antibody - Product Information**

Application	WB
Primary Accession	<a href="#">O00170</a>
Host	Rabbit
Reactivity	Human
Clonality	Polyclonal
Format	Lyophilized

**Description**

Rabbit IgG polyclonal antibody for AH receptor-interacting protein(AIP) detection. Tested with WB in Human.

**Reconstitution**

Add 0.2ml of distilled water will yield a concentration of 500ug/ml.

**Anti-ARA9 Picoband Antibody - Additional Information**

**Gene ID** 9049

**Other Names**

AH receptor-interacting protein, AIP, Aryl-hydrocarbon receptor-interacting protein, HBV X-associated protein 2, XAP-2, Immunophilin homolog ARA9, AIP, XAP2

**Calculated MW**

37636 MW KDa

**Application Details**

Western blot, 0.1-0.5 µg/ml, Human<br>

**Subcellular Localization**

Cytoplasm.

**Tissue Specificity**

Widely expressed. Higher levels seen in the heart, placenta and skeletal muscle. Not expressed in the liver.

**Protein Name**

AH receptor-interacting protein

**Contents**

Each vial contains 5mg BSA, 0.9mg NaCl, 0.2mg Na<sub>2</sub>HPO<sub>4</sub>, 0.05mg Na<sub>3</sub>.

**Immunogen**

E.coli-derived human ARA9 recombinant protein (Position: D91-H330). Human ARA9 shares 95% amino acid (aa) sequence identity with both mouse and rat ARA9.

**Purification**

Immunogen affinity purified.

**Cross Reactivity**

No cross reactivity with other proteins

**Storage**

At -20°C for one year. After reconstitution, at 4°C for one month. It can also be aliquotted and stored frozen at -20°C for a longer time. Avoid repeated freezing and thawing.

**Sequence Similarities**

Contains 1 PPLase FKBP-type domain.

**Anti-ARA9 Picoband Antibody - Protein Information**

**Name** AIP

**Synonyms** XAP2

**Function**

May play a positive role in AHR-mediated (aromatic hydrocarbon receptor) signaling, possibly by influencing its receptivity for ligand and/or its nuclear targeting.

**Cellular Location**

Cytoplasm.

**Tissue Location**

Widely expressed. Higher levels seen in the heart, placenta and skeletal muscle. Not expressed in the liver

**Anti-ARA9 Picoband Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

#### **Anti-ARA9 Picoband Antibody - Background**

AIP, also known as, ARA9 or XAP-2, is a protein that in humans is encoded by the AIP gene. This gene is mapped to 11q13.2. The encoded protein is found in the cytoplasm as part of a multiprotein complex, but upon binding of ligand is transported to the nucleus. AIP may play a positive role in aryl hydrocarbon receptor-mediated signalling possibly by influencing its receptivity for ligand and/or its nuclear targeting. It has been shown that AIP is the cellular negative regulator of the hepatitis B virus (HBV) X protein. AIP mutations may be the cause of a familial form of acromegaly, familial isolated pituitary adenoma (FIPA).
