

Anti-SMYD3 Picoband Antibody
Catalog # ABO12579

Specification

Anti-SMYD3 Picoband Antibody - Product Information

Application	WB, IHC
Primary Accession	Q9H7B4
Host	Rabbit
Reactivity	Human
Clonality	Polyclonal
Format	Lyophilized

Description

Rabbit IgG polyclonal antibody for Histone-lysine N-methyltransferase SMYD3(SMYD3) detection. Tested with WB, IHC-P in Human.

Reconstitution

Add 0.2ml of distilled water will yield a concentration of 500ug/ml.

Anti-SMYD3 Picoband Antibody - Additional Information

Gene ID 64754

Other Names

Histone-lysine N-methyltransferase SMYD3, 2.1.1.43, SET and MYND domain-containing protein 3, Zinc finger MYND domain-containing protein 1, SMYD3, ZMYND1, ZNFN3A1

Calculated MW

49097 MW KDa

Application Details

Immunohistochemistry(Paraffin-embedded Section), 0.5-1 µg/ml, Human, By Heat

Western blot, 0.1-0.5 µg/ml, Human

Subcellular Localization

Cytoplasm . Nucleus . Mainly cytoplasmic when cells are arrested at G0/G1. Accumulates in the nucleus at S phase and G2/M.

Tissue Specificity

Expressed in skeletal muscles and testis. Overexpressed in a majority of colorectal and hepatocellular carcinomas. .

Protein Name

Histone-lysine N-methyltransferase SMYD3

Contents

Each vial contains 5mg BSA, 0.9mg NaCl, 0.2mg Na2HPO4, 0.05mg NaN3.

Immunogen

A synthetic peptide corresponding to a sequence at the C-terminus of human SMYD3 (388-428aa

QAMKNLRLAFDIMRVTHGREHSLIEDLILLLEECDANIRAS), different from the related mouse sequence by one amino acid.

Purification

Immunogen affinity purified.

Cross Reactivity

No cross reactivity with other proteins.

Storage

At -20°C for one year. After reconstitution, at 4°C for one month. It can also be aliquotted and stored frozen at -20°C for a longer time. Avoid repeated freezing and thawing.

Anti-SMYD3 Picoband Antibody - Protein Information

Name SMYD3

Synonyms ZMYND1, ZNFN3A1

Function

Histone methyltransferase. Specifically methylates 'Lys-4' of histone H3, inducing di- and tri-methylation, but not monomethylation (PubMed: [15235609](http://www.uniprot.org/citations/15235609), PubMed: [22419068](http://www.uniprot.org/citations/22419068)). Also methylates 'Lys-5' of histone H4 (PubMed: [22419068](http://www.uniprot.org/citations/22419068)). Plays an important role in transcriptional activation as a member of an RNA polymerase complex (PubMed: [15235609](http://www.uniprot.org/citations/15235609)). Binds DNA containing 5'-CCCTCC-3' or 5'-GAGGGG-3' sequences (PubMed: [15235609](http://www.uniprot.org/citations/15235609)).

Cellular Location

Cytoplasm. Nucleus. Note=Mainly cytoplasmic when cells are arrested at G0/G1. Accumulates in the nucleus at S phase and G2/M.

Tissue Location

Expressed in skeletal muscles and testis. Overexpressed in a majority of colorectal and hepatocellular carcinomas.

Anti-SMYD3 Picoband Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

Anti-SMYD3 Picoband Antibody - Images

Western blot analysis of SMYD3 expression in HELA whole cell lysates (lane 1) and COLO320 whole cell lysates (lane 2). SMYD3 at 55KD was detected using rabbit anti- SMYD3 Antigen Affinity purified polyclonal antibody (Catalog # ABO12579) at 0.5 µg/mL. The blot was developed using chemiluminescence (ECL) method .

SMYD3 was detected in paraffin-embedded sections of human intestinal cancer tissues using rabbit anti- SMYD3 Antigen Affinity purified polyclonal antibody (Catalog # ABO12579) at 1 µg/mL. The immunohistochemical section was developed using SABC method .

Anti-SMYD3 Picoband Antibody - Background

SET and MYND domain-containing protein 3 is a protein that in humans is encoded by the SMYD3 gene. The International Radiation Hybrid Mapping Consortium mapped the SMYD3 gene to chromosome 1. This gene encodes a histone methyltransferase which functions in RNA polymerase II complexes by an interaction with a specific RNA helicase. Multiple transcript variants encoding different isoforms have been found for this gene.
