

Anti-CASR Picoband Antibody

Catalog # ABO12609

Specification

Anti-CASR Picoband Antibody - Product Information

ApplicationWB, IHCPrimary AccessionP41180HostRabbitReactivityHuman, Mouse, RatClonalityPolyclonalFormatLyophilizedDescriptionRabbit lgG polyclonal antibody for Extracellular calcium-sensing receptor(CASR)

Rabbit IgG polyclonal antibody for Extracellular calcium-sensing receptor(CASR) detection. Tested with WB, IHC-P in Human;Mouse;Rat.

Reconstitution Add 0.2ml of distilled water will yield a concentration of 500ug/ml.

Anti-CASR Picoband Antibody - Additional Information

Gene ID 846

Other Names Extracellular calcium-sensing receptor, CaSR, Parathyroid cell calcium-sensing receptor 1, PCaR1, CASR, GPRC2A, PCAR1

Calculated MW 120674 MW KDa

Application Details Immunohistochemistry(Paraffin-embedded Section), 0.5-1 µg/ml, Mouse, Rat, Human, By Heat

 Western blot, 0.1-0.5 µg/ml, Human, Mouse, Rat

Subcellular Localization Cell membrane ; Multi-pass membrane protein .

Tissue Specificity Expressed in the temporal lobe, frontal lobe, parietal lobe, hippocampus, and cerebellum. Also found in kidney, lung, liver, heart, skeletal muscle, placenta. .

Protein Name Extracellular calcium-sensing receptor

Contents Each vial contains 5mg BSA, 0.9mg NaCl, 0.2mg Na2HPO4, 0.05mg NaN3.

Immunogen

E. coli-derived human CASR recombinant protein (Position: Q926-S1078). Human CASR shares 80.5% and 78.6% amino acid (aa) sequence identity with mouse and rat CASR, respectively.

Purification Immunogen affinity purified.

Cross Reactivity No cross reactivity with other proteins

Storage

At -20°C for one year. After r°Constitution, at 4°C for one month. It°Can also be aliquotted and stored frozen at -20°C for a longer time. Avoid repeated freezing and thawing.

Anti-CASR Picoband Antibody - Protein Information

Name CASR (HGNC:1514)

Function

G-protein-coupled receptor that senses changes in the extracellular concentration of calcium ions and plays a key role in maintaining calcium homeostasis (PubMed:17555508, PubMed:19789209, PubMed:21566075, PubMed:22114145, PubMed:22789683, PubMed:23966241, PubMed:25104082, PubMed:25292184, PubMed:25766501, PubMed:26386835, PubMed:7759551, PubMed:8636323, PubMed:8702647, PubMed:8878438). Senses fluctuations in the circulating calcium concentration and modulates the production of parathyroid hormone (PTH) in parathyroid glands (By similarity). The activity of this receptor is mediated by a G-protein that activates a phosphatidylinositol-calcium second messenger system (PubMed: 7759551). The G-protein-coupled receptor activity is activated by a co-agonist mechanism: aromatic amino acids, such as Trp or Phe, act concertedly with divalent cations, such as calcium or magnesium, to achieve full receptor activation (PubMed: 27386547, PubMed:27434672).

Cellular Location Cell membrane; Multi-pass membrane protein

Tissue Location

Expressed in the temporal lobe, frontal lobe, parietal lobe, hippocampus, and cerebellum. Also found in kidney, lung, liver, heart, skeletal muscle, placenta.

Anti-CASR Picoband Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- <u>Blocking Peptides</u>
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

Anti-CASR Picoband Antibody - Images

Western blot analysis of CASR expression in HELA whole cell lysates (lane 1) and 22RV1 whole cell lysates (lane 2). CASR at 150KD was detected using rabbit anti- CASR Antigen Affinity purified polyclonal antibody (Catalog # ABO12609) at 0.5 $\hat{1}_{4}$ g/mL. The blot was developed using chemiluminescence (ECL) method .

CASR was detected in paraffin-embedded sections of mouse kidney tissues using rabbit anti-CASR Antigen Affinity purified polyclonal antibody (Catalog # ABO12609) at 1 ??g/mL. The immunohistochemical section was developed using SABC method .

CASR was detected in paraffin-embedded sections of rat kidney tissues using rabbit anti- CASR Antigen Affinity purified polyclonal antibody (Catalog # ABO12609) at 1 $\hat{1}/_4$ g/mL. The immunohistochemical section was developed using SABC method.

Anti-CASR Picoband Antibody - Background

The calcium-sensing receptor (CaSR) is a G protein-coupled receptor that is expressed in the parathyroid hormone (PTH)-producing chief cells of the parathyroid gland, and the cells lining the kidney tubule. It senses small changes in circulating calcium concentration and couples this information to intracellular signaling pathways that modify PTH secretion or renal cation handling, thus this protein plays an essential role in maintaining mineral ion homeostasis. Mutations in this gene cause familial hypocalciuric hypercalcemia, familial, isolated hypoparathyroidism, and neonatal severe primary hyperparathyroidism.
