

Anti-IKK gamma Picoband Antibody
Catalog # ABO12896**Specification****Anti-IKK gamma Picoband Antibody - Product Information**

Application	WB
Primary Accession	Q9Y6K9
Host	Rabbit
Isotype	Rabbit IgG
Reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Format	Lyophilized

Description

Rabbit IgG polyclonal antibody for NF-kappa-B essential modulator(IKBKG) detection. Tested with WB in Human;Mouse;Rat.

Reconstitution

Add 0.2ml of distilled water will yield a concentration of 500ug/ml.

Anti-IKK gamma Picoband Antibody - Additional Information

Gene ID 8517

Other Names

NF-kappa-B essential modulator, NEMO, FIP-3, Ikb kinase-associated protein 1, IKKAP1, Inhibitor of nuclear factor kappa-B kinase subunit gamma, I-kappa-B kinase subunit gamma, IKK-gamma, IKKG, Ikb kinase subunit gamma, NF-kappa-B essential modifier, IKBKG, FIP3, NEMO

Calculated MW

48198 MW KDa

Application Details

Western blot, 0.1-0.5 µg/ml, Human, Mouse, Rat

Subcellular Localization

Cytoplasm . Nucleus . Sumoylated NEMO accumulates in the nucleus in response to genotoxic stress.

Tissue Specificity

Heart, brain, placenta, lung, liver, skeletal muscle, kidney and pancreas.

Contents

Each vial contains 5mg BSA, 0.9mg NaCl, 0.2mg Na₂HPO₄, 0.05mg Na₃.

Immunogen

A synthetic peptide corresponding to a sequence in the middle region of human IKK gamma (207-246aa QSVEAALRMERQAASEEKRKLALQVAYHQLFQEYDNIK), different from the related mouse and rat sequences by three amino acids.

Cross Reactivity

No cross reactivity with other proteins.

Storage

At -20°C for one year. After r^o Constitution, at 4°C for one month. It^o Can also be aliquotted and stored frozen at -20°C for a longer time. Avoid repeated freezing and thawing.

Anti-IKK gamma Picoband Antibody - Protein Information

Name IKBKG ([HGNC:5961](#))

Synonyms FIP3, NEMO

Function

Regulatory subunit of the IKK core complex which phosphorylates inhibitors of NF-kappa-B thus leading to the dissociation of the inhibitor/NF-kappa-B complex and ultimately the degradation of the inhibitor (PubMed:[14695475](http://www.uniprot.org/citations/14695475)), PubMed:[20724660](http://www.uniprot.org/citations/20724660)), PubMed:[21518757](http://www.uniprot.org/citations/21518757)), PubMed:[9751060](http://www.uniprot.org/citations/9751060)). Its binding to scaffolding polyubiquitin plays a key role in IKK activation by multiple signaling receptor pathways (PubMed:[16547522](http://www.uniprot.org/citations/16547522)), PubMed:[18287044](http://www.uniprot.org/citations/18287044)), PubMed:[19033441](http://www.uniprot.org/citations/19033441)), PubMed:[19185524](http://www.uniprot.org/citations/19185524)), PubMed:[21606507](http://www.uniprot.org/citations/21606507)), PubMed:[27777308](http://www.uniprot.org/citations/27777308)), PubMed:[33567255](http://www.uniprot.org/citations/33567255)). Can recognize and bind both 'Lys-63'-linked and linear polyubiquitin upon cell stimulation, with a much higher affinity for linear polyubiquitin (PubMed:[16547522](http://www.uniprot.org/citations/16547522)), PubMed:[18287044](http://www.uniprot.org/citations/18287044)), PubMed:[19033441](http://www.uniprot.org/citations/19033441)), PubMed:[19185524](http://www.uniprot.org/citations/19185524)), PubMed:[21606507](http://www.uniprot.org/citations/21606507)), PubMed:[27777308](http://www.uniprot.org/citations/27777308)). Could be implicated in NF-kappa-B-mediated protection from cytokine toxicity. Essential for viral activation of IRF3 (PubMed:[19854139](http://www.uniprot.org/citations/19854139)). Involved in TLR3- and IFIH1-mediated antiviral innate response; this function requires 'Lys- 27'-linked polyubiquitination (PubMed:[20724660](http://www.uniprot.org/citations/20724660)).

Cellular Location

Cytoplasm. Nucleus Note=Sumoylated NEMO accumulates in the nucleus in response to genotoxic stress.

Tissue Location

Heart, brain, placenta, lung, liver, skeletal muscle, kidney and pancreas

Anti-IKK gamma Picoband Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

Anti-IKK gamma Picoband Antibody - Images

Figure 1. Western blot analysis of IKK gamma using anti-IKK gamma antibody (ABO12896). Electrophoresis was performed on a 5-20% SDS-PAGE gel at 70V (Stacking gel) / 90V (Resolving gel) for 2-3 hours. The sample well of each lane was loaded with 50ug of sample under reducing conditions. lane 1: rat cardiac muscle tissue lysates, lane 2: HEPG2 whole cell lysates. After Electrophoresis, proteins were transferred to a Nitrocellulose membrane at 150mA for 50-90 minutes. Blocked the membrane with 5% Non-fat Milk/ TBS for 1.5 hour at RT. The membrane was incubated with rabbit anti-IKK gamma antigen affinity purified polyclonal antibody (Catalog # ABO12896) at 0.5 µg/mL overnight at 4°C, then washed with TBS-0.1% Tween 3 times with 5 minutes each and probed with a goat anti-rabbit IgG-HRP secondary antibody at a dilution of 1:10000 for 1.5 hour at RT. The signal is developed using an Enhanced Chemiluminescent detection (ECL) kit with Tanon 5200 system. A specific band was detected for IKK gamma at approximately 48KD. The expected band size for IKK gamma is at 48KD.
