

Anti-CD8 alpha Rabbit Monoclonal Antibody Catalog # ABO13958

Specification

Anti-CD8 alpha Rabbit Monoclonal Antibody - Product Information

Application	IHC
Primary Accession	P01732
Host	Rabbit
Isotype	Rabbit IgG
Reactivity	Human
Clonality	Monoclonal
Format	Liquid

Description

Anti-CD8 alpha Rabbit Monoclonal Antibody . Tested in IHC application. This antibody reacts with Human.

Anti-CD8 alpha Rabbit Monoclonal Antibody - Additional Information

Gene ID 925

Other Names

T-cell surface glycoprotein CD8 alpha chain, T-lymphocyte differentiation antigen T8/Leu-2, CD8a, CD8A, MAL

Calculated MW

25729 MW KDa

Application Details

IHC 1:50-1:200

Subcellular Localization

Isoform 1: Cell membrane; Single-pass type I membrane protein.

Contents

Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol, 0.4-0.5mg/ml BSA.

Immunogen

A synthesized peptide derived from human CD8 alpha

Purification

Affinity-chromatography

Storage

Store at -20°C for one year. For short term storage and frequent use, store at 4°C for up to one month. Avoid repeated freeze-thaw cycles.

Anti-CD8 alpha Rabbit Monoclonal Antibody - Protein Information

Name CD8A

Synonyms MAL

Function

Integral membrane glycoprotein that plays an essential role in the immune response and serves multiple functions in responses against both external and internal offenses. In T-cells, functions primarily as a coreceptor for MHC class I molecule:peptide complex. The antigens presented by class I peptides are derived from cytosolic proteins while class II derived from extracellular proteins. Interacts simultaneously with the T-cell receptor (TCR) and the MHC class I proteins presented by antigen presenting cells (APCs). In turn, recruits the Src kinase LCK to the vicinity of the TCR-CD3 complex. LCK then initiates different intracellular signaling pathways by phosphorylating various substrates ultimately leading to lymphokine production, motility, adhesion and activation of cytotoxic T- lymphocytes (CTLs). This mechanism enables CTLs to recognize and eliminate infected cells and tumor cells. In NK-cells, the presence of CD8A homodimers at the cell surface provides a survival mechanism allowing conjugation and lysis of multiple target cells. CD8A homodimer molecules also promote the survival and differentiation of activated lymphocytes into memory CD8 T-cells.

Cellular Location

[Isoform 1]: Cell membrane; Single-pass type I membrane protein Note=CD8A localizes to lipid rafts only when associated with its partner CD8B.

Tissue Location

CD8 on thymus-derived T-cells usually consists of a disulfide-linked alpha/CD8A and a beta/CD8B chain. Less frequently, CD8 can be expressed as a CD8A homodimer. A subset of natural killer cells, memory T-cells, intraepithelial lymphocytes, monocytes and dendritic cells expresses CD8A homodimers. Expressed at the cell surface of plasmacytoid dendritic cells upon herpes simplex virus-1 stimulation

Anti-CD8 alpha Rabbit Monoclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Anti-CD8 alpha Rabbit Monoclonal Antibody - Images

Immunohistochemical analysis of paraffin-embedded Rat liver, using the Antibody at 1:100 dilution.

Immunohistochemical analysis of paraffin-embedded Human testis cancer, using the Antibody at 1:300 dilution.

Immunohistochemical analysis of paraffin-embedded Human melanoma, using the Antibody at 1:300 dilution.

Immunohistochemical analysis of paraffin-embedded Human astrocytoma, using the Antibody at 1:300 dilution.

Immunohistochemical analysis of paraffin-embedded Mouse testis, using the Antibody at 1:100 dilution.

Immunohistochemical analysis of paraffin-embedded human spleen, using CD8 alpha Antibody.
