Anti-IL10 Monoclonal Antibody

Catalog # ABO14381

Specification

## Anti-IL10 Monoclonal Antibody - Product Information

| Application                       | WB, IF, ICC, FC                     |
|-----------------------------------|-------------------------------------|
| Primary Accession                 | <u>P22301</u>                       |
| Host                              | Rabbit                              |
| Isotype                           | Rabbit IgG                          |
| Reactivity                        | Human, Mouse                        |
| Clonality                         | Monoclonal                          |
| Format                            | Liquid                              |
| Description                       |                                     |
| Anti-IL10 Monoclonal Antibody . T | ested in WB, ICC/IF, Flow Cytometry |

# Anti-IL10 Monoclonal Antibody - Additional Information

Gene ID 3586

reacts with Human, Mouse.

**Other Names** Interleukin-10, IL-10, Cytokine synthesis inhibitory factor, CSIF, IL10

Application Details WB 1:500-1:2000<br>ICC/IF 1:50-1:200<br>FC 1:50

**Contents** Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol, 0.4-0.5mg/ml BSA.

Immunogen

A synthesized peptide derived from human IL10 Interleukin-10 (IL-10) is an anti-inflammatory cytokine that is produced by T cells, NK cells, and macrophages. IL-10 initiates signal transduction by binding to a cell surface receptor complex consisting of IL-10 RI and IL-10 RII, leading to the activation of Jak1 and Tyk2 and phosphorylation of Stat3.

Purification Affinity-chromatography

Storage

Store at -20°C for one year. For short term storage and frequent use, store at 4°C for up to one month. Avoid repeated freeze-thaw cycles.

### Anti-IL10 Monoclonal Antibody - Protein Information

Name IL10

## Function

Major immune regulatory cytokine that acts on many cells of the immune system where it has profound anti-inflammatory functions, limiting excessive tissue disruption caused by inflammation. Mechanistically, IL10 binds to its heterotetrameric receptor comprising IL10RA and IL10RB leading to JAK1 and STAT2-mediated phosphorylation of STAT3 (PubMed:<a

href="http://www.uniprot.org/citations/16982608" target="\_blank">16982608</a>). In turn, STAT3 translocates to the nucleus where it drives expression of anti-inflammatory mediators (PubMed:<a href="http://www.uniprot.org/citations/18025162" target="\_blank">18025162</a>). Targets antigen-presenting cells (APCs) such as macrophages and monocytes and inhibits their release of pro- inflammatory cytokines including granulocyte-macrophage colony- stimulating factor /GM-CSF, granulocyte colony-stimulating factor/G- CSF, IL-1 alpha, IL-1 beta, IL-6, IL-8 and TNF-alpha (PubMed:<a href="http://www.uniprot.org/citations/11564774" target=" blank">11564774</a>, PubMed:<a href="http://www.uniprot.org/citations/1940799"

target= \_blank >11564774</a>, PubMed:<a href= http://www.uniprot.org/citations/1940799 target="\_blank">1940799</a>, PubMed:<a href="http://www.uniprot.org/citations/7512027" target="\_blank">7512027</a>). Interferes also with antigen presentation by reducing the expression of MHC-class II and co- stimulatory molecules, thereby inhibiting their ability to induce T cell activation (PubMed:<a href="http://www.uniprot.org/citations/8144879"

target="\_blank">8144879</a>). In addition, controls the inflammatory response of macrophages by reprogramming essential metabolic pathways including mTOR signaling (By similarity).

**Cellular Location** Secreted.

**Tissue Location** Produced by a variety of cell lines, including T- cells, macrophages, mast cells and other cell types

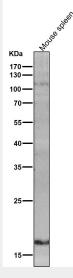

### Anti-IL10 Monoclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

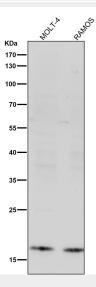

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
