

## Anti-PEF1 Rabbit Monoclonal Antibody

Catalog # ABO16376

#### Specification

# Anti-PEF1 Rabbit Monoclonal Antibody - Product Information

Application **WB Primary Accession O9UBV8** Rabbit Host Isotype laG Reactivity Rat, Human, Mouse Clonality Monoclonal Format Liquid Description Anti-PEF1 Rabbit Monoclonal Antibody . Tested in WB application. This antibody reacts with Human, Mouse, Rat.

# Anti-PEF1 Rabbit Monoclonal Antibody - Additional Information

Gene ID 553115

**Other Names** Peflin, PEF protein with a long N-terminal hydrophobic domain, Penta-EF hand domain-containing protein 1 {ECO:0000312|HGNC:HGNC:30009}, PEF1 (<a href="http://www.genenames.org/cgi-bin/gene\_symbol\_report?hgnc\_id=30009" target="\_blank">HGNC:30009</a>), ABP32

Calculated MW 30 kDa KDa

Application Details WB 1:500-1:2000

**Contents** Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol, 0.4-0.5mg/ml BSA.

Immunogen A synthesized peptide derived from human PEF1

Purification Affinity-chromatography

Storage

Store at -20°C for one year. For short term storage and frequent use, store at 4°C for up to one month. Avoid repeated freeze-thaw cycles.

# Anti-PEF1 Rabbit Monoclonal Antibody - Protein Information

## Name PEF1 (<u>HGNC:30009</u>)

### Synonyms ABP32

### Function

Calcium-binding protein that acts as an adapter that bridges unrelated proteins or stabilizes weak protein-protein complexes in response to calcium. Together with PDCD6, acts as a calcium-dependent adapter for the BCR(KLHL12) complex, a complex involved in endoplasmic reticulum (ER)-Golgi transport by regulating the size of COPII coats (PubMed: <a href="http://www.uniprot.org/citations/27716508" target="\_blank">27716508</a>). In response to cytosolic calcium increase, the heterodimer formed with PDCD6 interacts with, and bridges together the BCR(KLHL12) complex and SEC31 (SEC31A or SEC31B), promoting monoubiguitination of SEC31 and subsequent collagen export, which is required for neural crest specification (PubMed:<a href="http://www.uniprot.org/citations/27716508" target=" blank">27716508</a>). Its role in the heterodimer formed with PDCD6 is however unclear: some evidence shows that PEF1 and PDCD6 work together and promote association between PDCD6 and SEC31 in presence of calcium (PubMed: <a href="http://www.uniprot.org/citations/27716508" target=" blank">27716508</a>). Other reports show that PEF1 dissociates from PDCD6 in presence of calcium, and may act as a negative regulator of PDCD6 (PubMed:<a href="http://www.uniprot.org/citations/11278427" target=" blank">11278427</a>). Also acts as a negative regulator of ER-Golgi transport; possibly by inhibiting interaction between PDCD6 and SEC31 (By similarity).

#### **Cellular Location**

Cytoplasm. Endoplasmic reticulum {ECO:0000250|UniProtKB:Q641Z8}. Membrane; Peripheral membrane protein. Cytoplasmic vesicle, COPII-coated vesicle membrane; Peripheral membrane protein. Note=Membrane-associated in the presence of Ca(2+) (PubMed:11278427). Localizes to endoplasmic reticulum exit site (ERES) (By similarity). {ECO:0000250|UniProtKB:Q641Z8, ECO:0000269|PubMed:11278427}

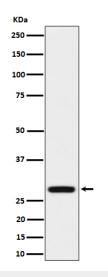

# Anti-PEF1 Rabbit Monoclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

Anti-PEF1 Rabbit Monoclonal Antibody - Images

Western blot analysis of PEF1 expression in HeLa cell lysate.
