

**MDM2**  
Mouse Monoclonal antibody(Mab)  
Catalog # AD80300

## Specification

---

### MDM2 - Product info

Application	IHC-P
Primary Accession	<a href="#">Q00987</a>
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Calculated MW	55233

### MDM2 - Additional info

Gene ID	4193
Gene Name	MDM2

#### Other Names

E3 ubiquitin-protein ligase Mdm2, 2.3.2.27, Double minute 2 protein, Hdm2, Oncoprotein Mdm2, RING-type E3 ubiquitin transferase Mdm2, p53-binding protein Mdm2, MDM2

#### Dilution

IHC-P~~Ready-to-use

#### Storage

Maintain refrigerated at 2-8°C

#### Precautions

**MDM2 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.**

### MDM2 - Protein Information

Name MDM2

#### Function

**E3 ubiquitin-protein ligase that mediates ubiquitination of p53/TP53, leading to its degradation by the proteasome. Inhibits p53/TP53- and p73/TP73-mediated cell cycle arrest and apoptosis by binding its transcriptional activation domain. Also acts as a ubiquitin ligase E3 toward itself and ARRB1. Permits the nuclear export of p53/TP53. Promotes proteasome-dependent ubiquitin-independent degradation of retinoblastoma RB1 protein. Inhibits DAXX-mediated apoptosis by inducing its ubiquitination and degradation.**

	<p>Component of the TRIM28/KAP1-MDM2-p53/TP53 complex involved in stabilizing p53/TP53. Also component of the TRIM28/KAP1-ERBB4-MDM2 complex which links growth factor and DNA damage response pathways. Mediates ubiquitination and subsequent proteasome degradation of DYRK2 in nucleus. Ubiquitinates IGF1R and SNAI1 and promotes them to proteasomal degradation (PubMed:<a href="#">12821780</a>, PubMed:<a href="#">15053880</a>, PubMed:<a href="#">15195100</a>, PubMed:<a href="#">15632057</a>, PubMed:<a href="#">16337594</a>, PubMed:<a href="#">17290220</a>, PubMed:<a href="#">19098711</a>, PubMed:<a href="#">19219073</a>, PubMed:<a href="#">19837670</a>, PubMed:<a href="#">19965871</a>, PubMed:<a href="#">20173098</a>, PubMed:<a href="#">20385133</a>, PubMed:<a href="#">20858735</a>, PubMed:<a href="#">22128911</a>). Ubiquitinates DCX, leading to DCX degradation and reduction of the dendritic spine density of olfactory bulb granule cells (By similarity). Ubiquitinates DLG4, leading to proteasomal degradation of DLG4 which is required for AMPA receptor endocytosis (By similarity).</p>
Cellular Location	<p>Nucleus, nucleoplasm. Cytoplasm. Nucleus, nucleolus. Note=Expressed predominantly in the nucleoplasm Interaction with ARF(P14) results in the localization of both proteins to the nucleolus. The nucleolar localization signals in both ARF(P14) and MDM2 may be necessary to allow efficient nucleolar localization of both proteins. Colocalizes with RASSF1 isoform A in the nucleus</p>
Tissue Location	<p>Ubiquitous. Isoform Mdm2-A, isoform Mdm2-B, isoform Mdm2-C, isoform Mdm2-D, isoform Mdm2-E, isoform Mdm2-F and isoform Mdm2-G are observed in a range of cancers but absent in normal tissues</p>

## MDM2 - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)
