

Arginase-1

Rabbit Monoclonal antibody(Mab) **Catalog # AD80387**

Specification

Arginase-1 - Product info

Application IHC-P, IHC **Primary Accession** P05089 Reactivity Human Host Rabbit Clonality **Monoclonal** Calculated MW 34735

Arginase-1 - Additional info

Gene ID 383 Gene Name ARG1

Other Names

Arginase-1, 3.5.3.1, Liver-type arginase, Type I arginase, ARG1

Dilution

IHC-P~~Ready-to-use IHC~~Ready-to-use

Storage

Maintain refrigerated at 2-8°C

Precautions Arginase-1 Antibody is for research use

only and not for use in diagnostic or

therapeutic procedures.

Arginase-1 - Protein Information

Name ARG1

Function Key element of the urea cycle converting

L-arginine to urea and L-ornithine, which is further metabolized into metabolites proline and polyamides that drive collagen synthesis and bioenergetic pathways critical for cell proliferation, respectively; the urea cycle takes place primarily in the

liver and, to a lesser extent, in the

kidneys.

Cytoplasm. Cytoplasmic granule.

Note=Localized in azurophil granules of

neutrophils (PubMed:15546957) Within the immune system initially reported to be selectively expressed in

Cellular Location

Tissue Location

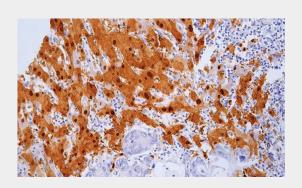

granulocytes (polymorphonuclear leukocytes [PMNs]) (PubMed:15546957). Also detected in macrophages mycobacterial granulomas (PubMed:23749634). Expressed in group2 innate lymphoid cells (ILC2s) during lung disease (PubMed:27043409).

Arginase-1 - Protocols

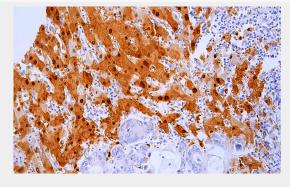

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

Arginase-1 - Images

Liver

Immunohistochemical analysis of paraffin-embedded human hepatocarcinoma tissue using AD80387 performed on the Abcarta® FAIP-30 Fully automated IHC platform. Tissue was fixed with formaldehyde at room temperature, antigen retrieval was by heat mediation with a EDTA buffer (pH9. 0). Samples were incubated with primary antibody(Ready-to-use) for 15 min at room temperature. AmpSeeTM Detection Systems Abcepta: AR005 was used as the secondary antibody.
