

**Goat Anti-CDK10 / PISSLRE Antibody**  
Peptide-affinity purified goat antibody  
Catalog # AF1221a

**Specification**

---

**Goat Anti-CDK10 / PISSLRE Antibody - Product Information**

|                   |  |
|-------------------|--|
| Application       | WB   |
| Primary Accession | <a href="#">Q15131</a>                           |
| Other Accession   | <a href="#">NP_443714</a> , <a href="#">8558</a> |
| Reactivity        | Human  |
| Host              | Goat   |
| Clonality         | Polyclonal                                       |
| Concentration     | 100ug/200ul                                      |
| Isotype           | IgG  |
| Calculated MW     | 41038  |

**Goat Anti-CDK10 / PISSLRE Antibody - Additional Information**

**Gene ID** 8558

**Other Names**

Cyclin-dependent kinase 10, 2.7.11.22, Cell division protein kinase 10, Serine/threonine-protein kinase PISSLRE, CDK10

**Format**

0.5 mg IgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

Goat Anti-CDK10 / PISSLRE Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**Goat Anti-CDK10 / PISSLRE Antibody - Protein Information**

**Name** CDK10

**Function**

Cyclin-dependent kinase that phosphorylates the transcription factor ETS2 (in vitro) and positively controls its proteasomal degradation (in cells) (PubMed:[24218572](http://www.uniprot.org/citations/24218572)). Involved in the regulation of actin cytoskeleton organization through the phosphorylation of actin dynamics regulators such as PKN2. Is a negative regulator of ciliogenesis through phosphorylation of PKN2 and promotion of RhoA signaling (PubMed:[27104747](http://www.uniprot.org/citations/27104747))

target="\_blank">27104747</a>).

#### Cellular Location

Cytoplasm, cytoskeleton, cilium basal body

#### Goat Anti-CDK10 / PISSLRE Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

#### Goat Anti-CDK10 / PISSLRE Antibody - Images

AF1221a (2 µg/ml) staining of Human Kidney lysate (35 µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

#### Goat Anti-CDK10 / PISSLRE Antibody - Background

The protein encoded by this gene belongs to the CDK subfamily of the Ser/Thr protein kinase family. The CDK subfamily members are highly similar to the gene products of *S. cerevisiae* cdc28, and *S. pombe* cdc2, and are known to be essential for cell cycle progression. This kinase has been shown to play a role in cellular proliferation and its function is limited to cell cycle G2-M phase. Multiple transcript variants encoding different isoforms have been found for this gene.
