

**Goat Anti-GAB2 Antibody**  
Peptide-affinity purified goat antibody  
Catalog # AF1454a

**Specification**

---

**Goat Anti-GAB2 Antibody - Product Information**

|                   |  |
|-------------------|--|
| Application       | WB   |
| Primary Accession | <a href="#">O9UQC2</a>   |
| Other Accession   | <a href="#">NP_036428</a> , <a href="#">9846</a> , <a href="#">14389 (mouse)</a> , <a href="#">84477 (rat)</a> |
| Reactivity        | Human  |
| Predicted         | Mouse, Rat, Dog  |
| Host              | Goat   |
| Clonality         | Polyclonal   |
| Concentration     | 100ug/200ul  |
| Isotype           | IgG  |
| Calculated MW     | 74458  |

**Goat Anti-GAB2 Antibody - Additional Information**

**Gene ID** 9846

**Other Names**

GRB2-associated-binding protein 2, GRB2-associated binder 2, Growth factor receptor bound protein 2-associated protein 2, pp100, GAB2, KIAA0571

**Format**

0.5 mg IgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

Goat Anti-GAB2 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**Goat Anti-GAB2 Antibody - Protein Information**

**Name** GAB2

**Synonyms** KIAA0571

**Function**

Adapter protein which acts downstream of several membrane receptors including cytokine, antigen, hormone, cell matrix and growth factor receptors to regulate multiple signaling pathways. Regulates osteoclast differentiation mediating the TNFRSF11A/RANK signaling. In allergic

response, it plays a role in mast cells activation and degranulation through PI-3-kinase regulation. Also involved in the regulation of cell proliferation and hematopoiesis.

#### Cellular Location

Cytoplasm. Cell membrane. Membrane raft {ECO:0000250|UniProtKB:Q9Z1S8}

### Goat Anti-GAB2 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

### Goat Anti-GAB2 Antibody - Background

This gene is a member of the GRB2-associated binding protein (GAB) gene family. These proteins contain pleckstrin homology (PH) domain, and bind SHP2 tyrosine phosphatase and GRB2 adapter protein. They act as adapters for transmitting various signals in response to stimuli through cytokine and growth factor receptors, and T- and B-cell antigen receptors. The protein encoded by this gene is the principal activator of phosphatidylinositol-3 kinase in response to activation of the high affinity IgE receptor. Two alternatively spliced transcripts encoding different isoforms have been described for this gene.
