

Goat Anti-GOT2 (aa 295 to 306) Antibody
Peptide-affinity purified goat antibody
Catalog # AF1490a**Specification**

Goat Anti-GOT2 (aa 295 to 306) Antibody - Product Information

| | |
|-------------------|--|
| Application | WB |
| Primary Accession | P00505 |
| Other Accession | NP_002071 , 2806 , 14719 (mouse) , 25721 (rat) |
| Reactivity | Human |
| Predicted | Mouse, Rat |
| Host | Goat |
| Clonality | Polyclonal |
| Concentration | 100ug/200ul |
| Isotype | IgG |
| Calculated MW | 47518 |

Goat Anti-GOT2 (aa 295 to 306) Antibody - Additional Information

Gene ID 2806

Other Names

Aspartate aminotransferase, mitochondrial, mAspAT, 2.6.1.1, 2.6.1.7, Fatty acid-binding protein, FABP-1, Glutamate oxaloacetate transaminase 2, Kynurenine aminotransferase 4, Kynurenine aminotransferase IV, Kynurenine--oxoglutarate transaminase 4, Kynurenine--oxoglutarate transaminase IV, Plasma membrane-associated fatty acid-binding protein, FABPpm, Transaminase A, GOT2

Format

0.5 mg IgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Goat Anti-GOT2 (aa 295 to 306) Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Goat Anti-GOT2 (aa 295 to 306) Antibody - Protein Information

Name GOT2 ([HGNC:4433](#))

Function

Catalyzes the irreversible transamination of the L-tryptophan metabolite L-kynurenine to form kynurenic acid (KA). As a member of the malate-aspartate shuttle, it has a key role in the

intracellular NAD(H) redox balance. Is important for metabolite exchange between mitochondria and cytosol, and for amino acid metabolism. Facilitates cellular uptake of long-chain free fatty acids.

Cellular Location

Mitochondrion matrix. Cell membrane. Note=Exposure to alcohol promotes translocation to the cell membrane.

Goat Anti-GOT2 (aa 295 to 306) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

Goat Anti-GOT2 (aa 295 to 306) Antibody - Images

AF1490a (0.03 µg/ml) staining of Human Kidney lysate (35 µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

Goat Anti-GOT2 (aa 295 to 306) Antibody - Background

Glutamic-oxaloacetic transaminase is a pyridoxal phosphate-dependent enzyme which exists in cytoplasmic and inner-membrane mitochondrial forms, GOT1 and GOT2, respectively. GOT plays a role in amino acid metabolism and the urea and tricarboxylic acid cycles. The two enzymes are homodimeric and show close homology.
