

**Goat Anti-KLF1 / EKLF Antibody**  
Peptide-affinity purified goat antibody  
Catalog # AF1592a

### Specification

---

#### Goat Anti-KLF1 / EKLF Antibody - Product Information

Application	E
Primary Accession	<a href="#">O13351</a>
Other Accession	<a href="#">NP_006554</a> , <a href="#">10661</a>
Reactivity	Human, Mouse
Predicted	Pig, Dog
Host	Goat
Clonality	Polyclonal
Concentration	100ug/200ul
Isotype	IgG
Calculated MW	38221

#### Goat Anti-KLF1 / EKLF Antibody - Additional Information

**Gene ID** 10661

#### Other Names

Krueppel-like factor 1, Erythroid krueppel-like transcription factor, EKLF, KLF1, EKLF

#### Format

0.5 mg IgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### Precautions

Goat Anti-KLF1 / EKLF Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

#### Goat Anti-KLF1 / EKLF Antibody - Protein Information

**Name** KLF1

**Synonyms** EKLF

#### Function

Transcription regulator of erythrocyte development that probably serves as a general switch factor during erythropoiesis. Is a dual regulator of fetal-to-adult globin switching. Binds to the CACCC box in the beta-globin gene promoter and acts as a preferential activator of this gene. Furthermore, it binds to the BCL11A promoter and activates expression of BCL11A, which in turn represses the

HBG1 and HBG2 genes. This dual activity ensures that, in most adults, fetal hemoglobin levels are low. Able to activate CD44 and AQP1 promoters. When sumoylated, acts as a transcriptional repressor by promoting interaction with CDH2/MI2beta and also represses megakaryocytic differentiation.

#### **Cellular Location**

Nucleus. Note=Colocalizes with SUMO1 in nuclear speckles.

#### **Tissue Location**

Expression restricted to adult bone marrow and fetal liver. Not expressed in myeloid nor lymphoid cell lines

### **Goat Anti-KLF1 / EKLF Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

### **Goat Anti-KLF1 / EKLF Antibody - Background**

This gene encodes a hematopoietic-specific transcription factor that induces high-level expression of adult beta-globin and other erythroid genes. The zinc-finger protein binds to the DNA sequence CCACACCCT found in the beta hemoglobin promoter. Heterozygous loss-of-function mutations in this gene result in the dominant In(Lu) blood phenotype.
