

Goat Anti-MCL1 Antibody

Peptide-affinity purified goat antibody Catalog # AF1659a

Specification

Goat Anti-MCL1 Antibody - Product Information

Application Primary Accession Other Accession Reactivity Predicted Host Clonality Concentration Isotype Calculated MW WB <u>Q07820</u> <u>NP_068779</u>, <u>4170</u>, <u>17210 (mouse)</u> Human, Mouse, Rat Pig, Dog Goat Polyclonal 0.5mg/ml IgG 37337

Goat Anti-MCL1 Antibody - Additional Information

Gene ID 4170

Other Names Induced myeloid leukemia cell differentiation protein Mcl-1, Bcl-2-like protein 3, Bcl2-L-3, Bcl-2-related protein EAT/mcl1, mcl1/EAT, MCL1, BCL2L3

Format

0.5 mg lgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Goat Anti-MCL1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Goat Anti-MCL1 Antibody - Protein Information

Name MCL1

Synonyms BCL2L3

Function

Involved in the regulation of apoptosis versus cell survival, and in the maintenance of viability but not of proliferation. Mediates its effects by interactions with a number of other regulators of apoptosis. Isoform 1 inhibits apoptosis. Isoform 2 promotes apoptosis.

Cellular Location

Membrane; Single-pass membrane protein. Cytoplasm. Mitochondrion. Nucleus, nucleoplasm Note=Cytoplasmic, associated with mitochondria

Goat Anti-MCL1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

Goat Anti-MCL1 Antibody - Images

AF1659a staining (1 μg/ml) of Human Lung lysate (RIPA buffer, 35 μg total protein per lar Primary incubated for 1 hour. Detected by chemiluminescence.

Goat Anti-MCL1 Antibody - Background

The protein encoded by this gene belongs to the Bcl-2 family. Alternative splicing occurs at this locus and two transcript variants encoding distinct isoforms have been identified. The longer gene product (isoform 1) enhances cell survival by inhibiting apoptosis while the alternatively spliced shorter gene product (isoform 2) promotes apoptosis and is death-inducing.
