

Goat Anti-MS2 / ADAM8 / CD156 Antibody
Peptide-affinity purified goat antibody
Catalog # AF1686a

Specification

Goat Anti-MS2 / ADAM8 / CD156 Antibody - Product Information

Application	WB
Primary Accession	P78325
Other Accession	NP_001157962 , 101 , 11501 (mouse)
Reactivity	Human
Host	Goat
Clonality	Polyclonal
Concentration	100ug/200ul
Isotype	IgG
Calculated MW	88771

Goat Anti-MS2 / ADAM8 / CD156 Antibody - Additional Information

Gene ID 101

Other Names

Disintegrin and metalloproteinase domain-containing protein 8, ADAM 8, 3.4.24.-, Cell surface antigen MS2, CD156a, ADAM8, MS2

Format

0.5 mg IgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Goat Anti-MS2 / ADAM8 / CD156 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Goat Anti-MS2 / ADAM8 / CD156 Antibody - Protein Information

Name ADAM8

Synonyms MS2

Function

Possible involvement in extravasation of leukocytes.

Cellular Location

Membrane; Single-pass type I membrane protein.

Tissue Location

Expressed on neutrophils and monocytes.

Goat Anti-MS2 / ADAM8 / CD156 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Goat Anti-MS2 / ADAM8 / CD156 Antibody - Images

AF1686a (1 µg/ml) staining of Human Bone Marrow lysate (35 µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

Goat Anti-MS2 / ADAM8 / CD156 Antibody - Background

This gene encodes a member of the ADAM (a disintegrin and metalloprotease domain) family. Members of this family are membrane-anchored proteins structurally related to snake venom disintegrins, and have been implicated in a variety of biological processes involving cell-cell and cell-matrix interactions, including fertilization, muscle development, and neurogenesis. The protein encoded by this gene may be involved in cell adhesion during neurodegeneration, and it is thought to be a target for allergic respiratory diseases, including asthma. Alternative splicing results in multiple transcript variants.
