

**Goat Anti-PPID / CyP-40 Antibody**  
Peptide-affinity purified goat antibody  
Catalog # AF1852a

**Specification**

---

**Goat Anti-PPID / CyP-40 Antibody - Product Information**

Application	WB
Primary Accession	<a href="#">Q08752</a>
Other Accession	<a href="#">NP_005029</a> , <a href="#">5481</a> , <a href="#">67738 (mouse)</a> , <a href="#">361967 (rat)</a>
Reactivity	Human
Predicted	Mouse, Rat, Dog
Host	Goat
Clonality	Polyclonal
Concentration	100ug/200ul
Isotype	IgG
Calculated MW	40764

**Goat Anti-PPID / CyP-40 Antibody - Additional Information**

**Gene ID** 5481

**Other Names**

Peptidyl-prolyl cis-trans isomerase D, PPIase D, 5.2.1.8, 40 kDa peptidyl-prolyl cis-trans isomerase, Cyclophilin-40, CYP-40, Cyclophilin-related protein, Rotamase D, PPID, CYP40, CYPD

**Format**

0.5 mg IgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

Goat Anti-PPID / CyP-40 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**Goat Anti-PPID / CyP-40 Antibody - Protein Information**

**Name** PPID ([HGNC:9257](#))

**Synonyms** CYP40, CYPD

**Function**

PPIase that catalyzes the cis-trans isomerization of proline imidic peptide bonds in oligopeptides and may therefore assist protein folding (PubMed:<a href="http://www.uniprot.org/citations/11350175" target="\_blank">11350175</a>, PubMed:<a

[20676357](http://www.uniprot.org/citations/20676357)). Proposed to act as a co-chaperone in HSP90 complexes such as in unligated steroid receptors heterocomplexes. Different co-chaperones seem to compete for association with HSP90 thus establishing distinct HSP90-co-chaperone-receptor complexes with the potential to exert tissue-specific receptor activity control. May have a preference for estrogen receptor complexes and is not found in glucocorticoid receptor complexes. May be involved in cytoplasmic dynein-dependent movement of the receptor from the cytoplasm to the nucleus. May regulate MYB by inhibiting its DNA-binding activity. Involved in regulation of AHR signaling by promoting the formation of the AHR:ARNT dimer; the function is independent of HSP90 but requires the chaperone activity. Involved in regulation of UV radiation-induced apoptosis. Promotes cell viability in anaplastic lymphoma kinase-positive anaplastic large-cell lymphoma (ALK+ ALCL) cell lines.

#### Cellular Location

Cytoplasm. Nucleus, nucleolus. Nucleus, nucleoplasm

#### Tissue Location

Widely expressed.

### Goat Anti-PPID / CyP-40 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

### Goat Anti-PPID / CyP-40 Antibody - Images

AF1852a (0.1 µg/ml) staining of Human Brain (Frontal Cortex) lysate (35 µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

HEK293 overexpressing CyP-40 (RC206039) and probed with AF1852a (mock transfection in first lane), tested by Origene.

#### **Goat Anti-PPID / CyP-40 Antibody - Background**

The protein encoded by this gene is a member of the peptidyl-prolyl cis-trans isomerase (PPIase) family. PPIases catalyze the cis-trans isomerization of proline imidic peptide bonds in oligopeptides and accelerate the folding of proteins. This protein has been shown to possess PPIase activity and, similar to other family members, can bind to the immunosuppressant cyclosporin A.
