

Goat Anti-PSPH Antibody
Peptide-affinity purified goat antibody
Catalog # AF1876a

Specification

Goat Anti-PSPH Antibody - Product Information

Application	WB
Primary Accession	P78330
Other Accession	NP_004568 , 5723 , 100678 (mouse) , 304429 (rat)
Reactivity	Human, Mouse
Predicted	Rat
Host	Goat
Clonality	Polyclonal
Concentration	100ug/200ul
Isotype	IgG
Calculated MW	25008

Goat Anti-PSPH Antibody - Additional Information

Gene ID 5723

Other Names

Phosphoserine phosphatase, PSP, PSPase, 3.1.3.3, L-3-phosphoserine phosphatase, O-phosphoserine phosphohydrolase, PSPH

Format

0.5 mg IgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Goat Anti-PSPH Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Goat Anti-PSPH Antibody - Protein Information

Name PSPH ([HGNC:9577](#))

Function

Catalyzes the last irreversible step in the biosynthesis of L-serine from carbohydrates, the dephosphorylation of O-phospho-L-serine to L-serine (PubMed:[12213811](http://www.uniprot.org/citations/12213811), PubMed:[14673469](http://www.uniprot.org/citations/14673469), PubMed:[14673469](http://www.uniprot.org/citations/14673469), PubMed:[14673469](http://www.uniprot.org/citations/14673469))

[15291819](http://www.uniprot.org/citations/15291819), PubMed: [25080166](http://www.uniprot.org/citations/25080166), PubMed: [9222972](http://www.uniprot.org/citations/9222972)). L-serine can then be used in protein synthesis, to produce other amino acids, in nucleotide metabolism or in glutathione synthesis, or can be racemized to D-serine, a neuromodulator (PubMed: [14673469](http://www.uniprot.org/citations/14673469)). May also act on O-phospho-D-serine (Probable).

Cellular Location

Cytoplasm, cytosol.

Goat Anti-PSPH Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

Goat Anti-PSPH Antibody - Images

AF1876a (0.05 µg/ml) staining of Mouse Brain lysate (35 µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

Goat Anti-PSPH Antibody - Background

The protein encoded by this gene belongs to a subfamily of the phosphotransferases. This encoded enzyme is responsible for the third and last step in L-serine formation. It catalyzes magnesium-dependent hydrolysis of L-phosphoserine and is also involved in an exchange reaction between L-serine and L-phosphoserine. Deficiency of this protein is thought to be linked to Williams syndrome.
