Caspase 12 (aa232-244) Antibody (internal region) - Protein Information

Name CASP12

Function

May function as a negative regulator of inflammatory responses and innate immunity. May reduce cytokine release in response to bacterial lipopolysaccharide during infection. Reduces activation of NF-kappa-B in response to TNF (PubMed: <http://www.uniprot.org/citations/15129283> target="_blank">15129283). May lack protease activity (Probable).

Tissue Location

Widely expressed, with highest levels in lung.
