

**MMP3 (aa459-473) Antibody (C-Term)**  
Peptide-affinity purified goat antibody  
Catalog # AF3849a**Specification**

---

**MMP3 (aa459-473) Antibody (C-Term) - Product Information**

Application	WB
Primary Accession	<a href="#">P08254</a>
Other Accession	<a href="#">NP_002413.1</a> , <a href="#">4314</a>
Reactivity	Human
Host	Goat
Clonality	Polyclonal
Concentration	0.5 mg/ml
Isotype	IgG
Calculated MW	53977

**MMP3 (aa459-473) Antibody (C-Term) - Additional Information**

**Gene ID** 4314

**Other Names**

Stromelysin-1, SL-1, 3.4.24.17, Matrix metalloproteinase-3, MMP-3, Transin-1, MMP3, STMY1

**Format**

0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

MMP3 (aa459-473) Antibody (C-Term) is for research use only and not for use in diagnostic or therapeutic procedures.

**MMP3 (aa459-473) Antibody (C-Term) - Protein Information**

**Name** MMP3

**Synonyms** STMY1

**Function**

Metalloproteinase with a rather broad substrate specificity that can degrade fibronectin, laminin, gelatins of type I, III, IV, and V; collagens III, IV, X, and IX, and cartilage proteoglycans. Activates different molecules including growth factors, plasminogen or other matrix metalloproteinases such as MMP9 (PubMed: <http://www.uniprot.org/citations/11029580> target="\_blank">11029580</a>, PubMed: <http://www.uniprot.org/citations/1371271> target="\_blank">1371271</a>). Once released into the extracellular matrix (ECM), the inactive

pro-enzyme is activated by the plasmin cascade signaling pathway (PubMed:<a href="http://www.uniprot.org/citations/2383557" target="\_blank">2383557</a>). Acts also intracellularly (PubMed:<a href="http://www.uniprot.org/citations/22265821" target="\_blank">22265821</a>). For example, in dopaminergic neurons, gets activated by the serine protease HTRA2 upon stress and plays a pivotal role in DA neuronal degeneration by mediating microglial activation and alpha- synuclein/SNCA cleavage (PubMed:<a href="http://www.uniprot.org/citations/21330369" target="\_blank">21330369</a>). In addition, plays a role in immune response and possesses antiviral activity against various viruses such as vesicular stomatitis virus, influenza A virus (H1N1) and human herpes virus 1 (PubMed:<a href="http://www.uniprot.org/citations/35940311" target="\_blank">35940311</a>). Mechanistically, translocates from the cytoplasm into the cell nucleus upon virus infection to influence NF-kappa-B activities (PubMed:<a href="http://www.uniprot.org/citations/35940311" target="\_blank">35940311</a>).

#### Cellular Location

Secreted, extracellular space, extracellular matrix. Nucleus. Cytoplasm

#### MMP3 (aa459-473) Antibody (C-Term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

#### MMP3 (aa459-473) Antibody (C-Term) - Images

AF3849a (0.2 µg/ml) staining of Prostate lysate (35 µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

#### MMP3 (aa459-473) Antibody (C-Term) - References

Identification of proline residues in or near the transmembrane helices of the human breast cancer resistance protein (BCRP/ABCG2) that are important for transport activity and substrate specificity. Ni Z, Bikadi Z, Shuster DL, Zhao C, Rosenberg MF, Mao Q. *Biochemistry*. 2011 Sep 20;50(37):8057-66. PMID: 21854076
