

**ERK3 / MAPK6 Antibody (internal region, near C-Term)**  
Peptide-affinity purified goat antibody  
Catalog # AF3922a

**Specification**

---

**ERK3 / MAPK6 Antibody (internal region, near C-Term) - Product Information**

Application	WB, IP
Primary Accession	<a href="#">Q16659</a>
Other Accession	<a href="#">NP_002739.1</a> , <a href="#">5597</a> , <a href="#">50772 (mouse)</a> , <a href="#">58840 (rat)</a>
Reactivity	Mouse
Predicted	Human, Rat, Pig, Dog
Host	Goat
Clonality	Polyclonal
Concentration	0.5 mg/ml
Isotype	IgG
Calculated MW	82681

**ERK3 / MAPK6 Antibody (internal region, near C-Term) - Additional Information**

Gene ID 5597

**Other Names**

Mitogen-activated protein kinase 6, MAP kinase 6, MAPK 6, 2.7.11.24, Extracellular signal-regulated kinase 3, ERK-3, MAP kinase isoform p97, p97-MAPK, MAPK6, ERK3, PRKM6

**Format**

0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

ERK3 / MAPK6 Antibody (internal region, near C-Term) is for research use only and not for use in diagnostic or therapeutic procedures.

**ERK3 / MAPK6 Antibody (internal region, near C-Term) - Protein Information**

**Name** MAPK6

**Synonyms** ERK3, PRKM6

**Function**

Atypical MAPK protein. Phosphorylates microtubule-associated protein 2 (MAP2) and MAPKAPK5. The precise role of the complex formed with MAPKAPK5 is still unclear, but the complex follows a complex set of phosphorylation events: upon interaction with atypical MAPKAPK5, ERK3/MAPK6 is

phosphorylated at Ser-189 and then mediates phosphorylation and activation of MAPKAPK5, which in turn phosphorylates ERK3/MAPK6. May promote entry in the cell cycle (By similarity).

**Cellular Location**

Cytoplasm. Nucleus. Note=Translocates to the cytoplasm following interaction with MAPKAPK5

**Tissue Location**

Highest expression in the skeletal muscle, followed by the brain. Also found in heart, placenta, lung, liver, pancreas, kidney and skin fibroblasts

**ERK3 / MAPK6 Antibody (internal region, near C-Term) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

**ERK3 / MAPK6 Antibody (internal region, near C-Term) - Images**

HEK293 lysate (10ug protein in RIPA buffer) overexpressing GFP-fused Mouse ERK3 probed with AF3922a (0.5ug/ml) in left panel and with anti-GFP in right panel. GFP-only expression in the first lane. Primary incubations were for 2 hours. Detected by chemiluminescence.

AF3922a (1.5ug) immunoprecipitation from lysates of MK5/ERK3 double knockout MEFs, with (third lane) and without (fourth lane) rescued MK5/ERK3 expression through retroviral transduction. The corresponding lysates (first and second lane resp.) were analyzed in parallel in this Western blot labelled with rabbit anti-Erk3 (and co-precipitation was measured using mouse anti-MK5/PRAK in the lower panel).

**ERK3 / MAPK6 Antibody (internal region, near C-Term) - Background**

Reported variants represent identical protein (NP\_056621.4; NP\_081694.1).

**ERK3 / MAPK6 Antibody (internal region, near C-Term) - References**

The extracellular signal-regulated kinase 3 (mitogen-activated protein kinase 6 [MAPK6])-MAPK-activated protein kinase 5 signaling complex regulates septin function and dendrite morphology.
