

AHSG Antibody (internal region)
Peptide-affinity purified goat antibody
Catalog # AF4025a

Specification

AHSG Antibody (internal region) - Product Information

Application	WB
Primary Accession	P02765
Other Accession	NP_001613.2 , 197
Reactivity	Human
Host	Goat
Clonality	Polyclonal
Concentration	0.5 mg/ml
Isotype	IgG
Calculated MW	39341

AHSG Antibody (internal region) - Additional Information

Gene ID 197

Other Names

Alpha-2-HS-glycoprotein, Alpha-2-Z-globulin, Ba-alpha-2-glycoprotein, Fetuin-A, Alpha-2-HS-glycoprotein chain A, Alpha-2-HS-glycoprotein chain B, AHSG, FETUA

Format

0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

AHSG Antibody (internal region) is for research use only and not for use in diagnostic or therapeutic procedures.

AHSG Antibody (internal region) - Protein Information

Name AHSG

Synonyms FETUA

Function

Promotes endocytosis, possesses opsonic properties and influences the mineral phase of bone. Shows affinity for calcium and barium ions.

Cellular Location

Secreted.

Tissue Location

Synthesized in liver and selectively concentrated in bone matrix. Secreted in plasma. It is also found in dentin in much higher quantities than other plasma proteins

AHSG Antibody (internal region) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

AHSG Antibody (internal region) - Images

AF4025a (0.5 $\mu\text{g/ml}$) staining of Human albumin-depleted Serum (35 μg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.
