

**BLVRB (aa38-49) Antibody (internal region)**  
Peptide-affinity purified goat antibody  
Catalog # AF4094a**Specification**

---

**BLVRB (aa38-49) Antibody (internal region) - Product Information**

Application	WB
Primary Accession	<a href="#">P30043</a>
Other Accession	<a href="#">NP_000704.1</a> , <a href="#">645</a>
Reactivity	Human
Host	Goat
Clonality	Polyclonal
Concentration	0.5 mg/ml
Isotype	IgG
Calculated MW	22119

**BLVRB (aa38-49) Antibody (internal region) - Additional Information**

Gene ID 645

**Other Names**

Flavin reductase (NADPH), FR, 1.5.1.30, Biliverdin reductase B, BVR-B, 1.3.1.24, Biliverdin-IX beta-reductase, Green heme-binding protein, GHBP, NADPH-dependent diaphorase, NADPH-flavin reductase, FLR, BLVRB, FLR

**Format**

0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

BLVRB (aa38-49) Antibody (internal region) is for research use only and not for use in diagnostic or therapeutic procedures.

**BLVRB (aa38-49) Antibody (internal region) - Protein Information**

Name BLVRB ([HGNC:1063](#))

**Function**

Enzyme that can both act as a NAD(P)H-dependent reductase and a S-nitroso-CoA-dependent nitrosyltransferase (PubMed: [10620517](http://www.uniprot.org/citations/10620517) target="\_blank">10620517</a>, PubMed: [18241201](http://www.uniprot.org/citations/18241201) target="\_blank">18241201</a>, PubMed: [27207795](http://www.uniprot.org/citations/27207795) target="\_blank">27207795</a>, PubMed: [38056462](http://www.uniprot.org/citations/38056462) target="\_blank">38056462</a>, PubMed: [7929092](http://www.uniprot.org/citations/7929092) target="\_blank">7929092</a>)

target="\_blank">7929092</a>). Promotes fetal heme degradation during development (PubMed:<a href="http://www.uniprot.org/citations/10858451" target="\_blank">10858451</a>, PubMed:<a href="http://www.uniprot.org/citations/18241201" target="\_blank">18241201</a>, PubMed:<a href="http://www.uniprot.org/citations/7929092" target="\_blank">7929092</a>). Also expressed in adult tissues, where it acts as a regulator of hematopoiesis, intermediary metabolism (glutaminolysis, glycolysis, TCA cycle and pentose phosphate pathway) and insulin signaling (PubMed:<a href="http://www.uniprot.org/citations/27207795" target="\_blank">27207795</a>, PubMed:<a href="http://www.uniprot.org/citations/29500232" target="\_blank">29500232</a>, PubMed:<a href="http://www.uniprot.org/citations/38056462" target="\_blank">38056462</a>). Has a broad specificity oxidoreductase activity by catalyzing the NAD(P)H-dependent reduction of a variety of flavins, such as riboflavin, FAD or FMN, biliverdins, methemoglobin and PQQ (pyrroloquinoline quinone) (PubMed:<a href="http://www.uniprot.org/citations/10620517" target="\_blank">10620517</a>, PubMed:<a href="http://www.uniprot.org/citations/18241201" target="\_blank">18241201</a>, PubMed:<a href="http://www.uniprot.org/citations/7929092" target="\_blank">7929092</a>). Contributes to fetal heme catabolism by catalyzing reduction of biliverdin IXbeta into bilirubin IXbeta in the liver (PubMed:<a href="http://www.uniprot.org/citations/10858451" target="\_blank">10858451</a>, PubMed:<a href="http://www.uniprot.org/citations/18241201" target="\_blank">18241201</a>, PubMed:<a href="http://www.uniprot.org/citations/7929092" target="\_blank">7929092</a>). Biliverdin IXbeta, which constitutes the major heme catabolite in the fetus is not present in adult (PubMed:<a href="http://www.uniprot.org/citations/10858451" target="\_blank">10858451</a>, PubMed:<a href="http://www.uniprot.org/citations/18241201" target="\_blank">18241201</a>, PubMed:<a href="http://www.uniprot.org/citations/7929092" target="\_blank">7929092</a>). Does not reduce bilirubin IXalpha (PubMed:<a href="http://www.uniprot.org/citations/10858451" target="\_blank">10858451</a>, PubMed:<a href="http://www.uniprot.org/citations/18241201" target="\_blank">18241201</a>, PubMed:<a href="http://www.uniprot.org/citations/7929092" target="\_blank">7929092</a>). Can also reduce the complexed Fe(3+) iron to Fe(2+) in the presence of FMN and NADPH (PubMed:<a href="http://www.uniprot.org/citations/10620517" target="\_blank">10620517</a>). Acts as a protein nitrosyltransferase by catalyzing nitrosylation of cysteine residues of target proteins, such as HMOX2, INSR and IRS1 (PubMed:<a href="http://www.uniprot.org/citations/38056462" target="\_blank">38056462</a>). S-nitroso-CoA-dependent nitrosyltransferase activity is mediated via a 'ping-pong' mechanism: BLVRB first associates with both S-nitroso-CoA and protein substrate, nitric oxide group is then transferred from S-nitroso-CoA to Cys-109 and Cys-188 residues of BLVRB and from S-nitroso-BLVRB to the protein substrate (PubMed:<a href="http://www.uniprot.org/citations/38056462" target="\_blank">38056462</a>). Inhibits insulin signaling by mediating nitrosylation of INSR and IRS1, leading to their inhibition (PubMed:<a href="http://www.uniprot.org/citations/38056462" target="\_blank">38056462</a>).

### Cellular Location

Cytoplasm

### Tissue Location

Predominantly expressed in liver and erythrocytes (PubMed:7929092). At lower levels in heart, lung, adrenal gland and cerebrum (PubMed:7929092). Expressed in adult red blood cells (PubMed:29932944).

### BLVRB (aa38-49) Antibody (internal region) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)

- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
