AMACR (aa312-326) Antibody (internal region) - Protein Information

Name AMACR

Function

Catalyzes the interconversion of (R)- and (S)-stereoisomers of alpha-methyl-branched-chain fatty acyl-CoA esters (PubMed: [10655068](http://www.uniprot.org/citations/10655068) target="_blank">10655068, PubMed: [11060359](http://www.uniprot.org/citations/11060359) target="_blank">11060359, PubMed: [7649182](http://www.uniprot.org/citations/7649182) target="_blank">7649182). Acts only on coenzyme A thioesters, not on free fatty acids, and accepts as substrates a wide range of alpha-methylacyl-CoAs, including pristanoyl-CoA, trihydroxycoprostanoyl-CoA (an intermediate in bile acid synthesis), and arylpropionic acids like the anti-inflammatory drug ibuprofen (2- (4-isobutylphenyl)propionic acid) but neither

3-methyl-branched nor linear-chain acyl-CoAs (PubMed:10655068, PubMed:11060359, PubMed:7649182).

Cellular Location

Peroxisome. Mitochondrion
