

**Goat Anti-GDE1 / MIR16 Antibody (internal region)**  
**Purified Goat Polyclonal Antibody**  
**Catalog # AF4255a**

**Specification**

---

**Goat Anti-GDE1 / MIR16 Antibody (internal region) - Product Information**

Application	WB
Primary Accession	<a href="#">O9NZC3</a>
Other Accession	<a href="#">56209(mouse)</a> , <a href="#">60418(rat)</a> , <a href="#">NP_057725.1</a>
Reactivity	Mouse, Rat
Predicted	Human, Mouse, Rat, Dog
Host	Goat
Clonality	Polyclonal
Concentration	0.5
Calculated MW	37718

**Goat Anti-GDE1 / MIR16 Antibody (internal region) - Additional Information**

**Gene ID** 51573

**Other Names**

GDE1; glycerophosphodiester phosphodiesterase 1; 363E6.2; MIR16; RGS16-interacting membrane protein; membrane interacting protein of RGS16; membrane-interacting protein of RGS16

**Format**

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin. Aliquot and store at -20°C. Minimize freezing and thawing.

**Immunogen**

Peptide with sequence C-SLSHTGDGKPRYD , from the internal region of the protein sequence according to NP\_057725.1.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

Goat Anti-GDE1 / MIR16 Antibody (internal region) is for research use only and not for use in diagnostic or therapeutic procedures.

**Goat Anti-GDE1 / MIR16 Antibody (internal region) - Protein Information**

**Name** GDE1 ([HGNC:29644](#))

**Function**

Hydrolyzes the phosphodiester bond of glycerophosphodiester such as glycerophosphoinositol (GroPIs) and glycerophosphoethanolamine (GroPEth), to yield a glycerol phosphate and an

alcohol (By similarity). Hydrolyzes glycerophospho-N-acylethanolamines to N- acylethanolamines in the brain and participates in bioactive N- acylethanolamine biosynthesis such as anandamide (an endocannabinoid), N-palmitoylethanolamine (an anti-inflammatory), and N-oleoylethanolamine (an anorexic). In addition, has a lysophospholipase D activity by hydrolyzing N-acyl-lysoplasmeneylethanolamine (N-acyl- lysoPlsEt) to N-acylethanolamine. However lysophospholipase D activity is lower than glycerophosphodiester phosphodiesterase activity (By similarity). Has little or no activity towards glycerophosphocholine (By similarity).

#### Cellular Location

Cell membrane {ECO:0000250|UniProtKB:Q9JL55}; Multi-pass membrane protein. Cytoplasmic vesicle membrane {ECO:0000250|UniProtKB:Q9JL55}; Multi-pass membrane protein. Note=Perinuclear vesicles and cell membrane {ECO:0000250|UniProtKB:Q9JL55}

#### Tissue Location

Widely expressed..

### Goat Anti-GDE1 / MIR16 Antibody (internal region) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

### Goat Anti-GDE1 / MIR16 Antibody (internal region) - Images

AF4255a (0.3 µg/ml) staining of Mouse (A) and Rat (B) Brain lysates (35 µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.
