### Goat anti-CTDSP1, Biotinylated Antibody - Protein Information

Name CTDSP1

Synonyms NIF3, NLIIF, SCP1

#### Function

Preferentially catalyzes the dephosphorylation of 'Ser-5' within the tandem 7 residue repeats in

the C-terminal domain (CTD) of the largest RNA polymerase II subunit POLR2A. Negatively regulates RNA polymerase II transcription, possibly by controlling the transition from initiation/capping to processive transcript elongation. Recruited by REST to neuronal genes that contain RE-1 elements, leading to neuronal gene silencing in non-neuronal cells.

**Cellular Location**

Nucleus. Note=Colocalizes with RNA polymerase II

**Tissue Location**

Expression is restricted to non-neuronal tissues. Highest expression in skeletal muscle, spleen, lung and placenta
