

**Goat anti-LAG3 / CD223 Antibody**  
**Peptide-affinity purified goat antibody**  
**Catalog # AF4463a****Specification**

---

**Goat anti-LAG3 / CD223 Antibody - Product Information**

Application	<b>WB, Pep-ELISA</b>
Primary Accession	<a href="#">P18627</a>
Other Accession	<a href="#">NP_002277.4</a>
Reactivity	<b>Human</b>
Host	<b>Goat</b>
Clonality	<b>Polyclonal</b>
Calculated MW	<b>57449</b>

**Goat anti-LAG3 / CD223 Antibody - Additional Information****Gene ID** 3902**Other Names**

LAG3; lymphocyte activating 3; CD223; lymphocyte-activation gene 3

**Format**

Supplied at 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin. Aliquot and store at -20°C. Minimize freezing and thawing.

**Immunogen**

This antibody is expected to recognize the extra-cellular domain.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

Goat anti-LAG3 / CD223 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**Goat anti-LAG3 / CD223 Antibody - Protein Information****Name** LAG3 ([HGNC:6476](#))**Synonyms** FDC**Function**

Lymphocyte activation gene 3 protein: Inhibitory receptor on antigen activated T-cells (PubMed:&lt;a href="http://www.uniprot.org/citations/20421648" target="\_blank"&gt;20421648&lt;/a&gt;, PubMed:&lt;a href="http://www.uniprot.org/citations/7805750" target="\_blank"&gt;7805750&lt;/a&gt;, PubMed:&lt;a href="http://www.uniprot.org/citations/8647185" target="\_blank"&gt;8647185&lt;/a&gt;). Delivers

inhibitory signals upon binding to ligands, such as FGL1 (By similarity). FGL1 constitutes a major ligand of LAG3 and is responsible for LAG3 T-cell inhibitory function (By similarity). Following TCR engagement, LAG3 associates with CD3-TCR in the immunological synapse and directly inhibits T-cell activation (By similarity). May inhibit antigen-specific T-cell activation in synergy with PDCD1/PD-1, possibly by acting as a coreceptor for PDCD1/PD-1 (By similarity). Negatively regulates the proliferation, activation, effector function and homeostasis of both CD8(+) and CD4(+) T-cells (PubMed:<a href="http://www.uniprot.org/citations/20421648" target="\_blank">20421648</a>, PubMed:<a href="http://www.uniprot.org/citations/7805750" target="\_blank">7805750</a>, PubMed:<a href="http://www.uniprot.org/citations/8647185" target="\_blank">8647185</a>). Also mediates immune tolerance: constitutively expressed on a subset of regulatory T-cells (Tregs) and contributes to their suppressive function (By similarity). Also acts as a negative regulator of plasmacytoid dendritic cell (pDCs) activation (By similarity). Binds MHC class II (MHC-II); the precise role of MHC-II-binding is however unclear (PubMed:<a href="http://www.uniprot.org/citations/8647185" target="\_blank">8647185</a>).

**Cellular Location**

[Lymphocyte activation gene 3 protein]: Cell membrane; Single-pass type I membrane protein

**Tissue Location**

Primarily expressed in activated T-cells and a subset of natural killer (NK) cells.

**Goat anti-LAG3 / CD223 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.
