

**CD20 Antibody [Clone B9E9]**  
**Purified Mouse Monoclonal Antibody**  
**Catalog # AH10077**

**Specification**

---

**CD20 Antibody [Clone B9E9] - Product Information**

Application	FC
Primary Accession	<a href="#">P11836</a>
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgG2a, kappa
Calculated MW	33-37kDa KDa

**CD20 Antibody [Clone B9E9] - Additional Information**

**Gene ID** 931

**Other Names**

B-lymphocyte antigen CD20, B-lymphocyte surface antigen B1, Bp35, Leukocyte surface antigen Leu-16, Membrane-spanning 4-domains subfamily A member 1, CD20, MS4A1, CD20

**Target/Specificity**

Lymphoblastoid cell line Daudi

**Format**

0.5 ml at 100ug/ml; Conjugated to PE

**Storage**

Store at 2 to 8°C. Antibody is stable for 24 months.

**Precautions**

CD20 Antibody [Clone B9E9] is for research use only and not for use in diagnostic or therapeutic procedures.

**CD20 Antibody [Clone B9E9] - Protein Information**

**Name** MS4A1

**Synonyms** CD20

**Function**

B-lymphocyte-specific membrane protein that plays a role in the regulation of cellular calcium influx necessary for the development, differentiation, and activation of B-lymphocytes (PubMed: [12920111](http://www.uniprot.org/citations/12920111), PubMed: [3925015](http://www.uniprot.org/citations/3925015), PubMed: [7684739](http://www.uniprot.org/citations/7684739)). Functions as a store-operated calcium (SOC) channel component promoting calcium influx after activation by the

B-cell receptor/BCR (PubMed:<a href="http://www.uniprot.org/citations/12920111" target="\_blank">12920111</a>, PubMed:<a href="http://www.uniprot.org/citations/18474602" target="\_blank">18474602</a>, PubMed:<a href="http://www.uniprot.org/citations/7684739" target="\_blank">7684739</a>).

#### Cellular Location

Cell membrane; Multi-pass membrane protein. Cell membrane; Lipid-anchor. Note=Constitutively associated with membrane rafts.

#### Tissue Location

Expressed on B-cells.

### CD20 Antibody [Clone B9E9] - Protocols

Provided below are standard protocols that you may find useful for product applications.

### CD20 Antibody [Clone B9E9] - Background

Recognizes a protein of 33-37kDa, identified as CD20 (Workshop V; Code CD20.12). B9E9 recognizes extracellular domain of CD20. The epitope is similar to or identical to that recognized by other CD20 antibodies including Leu-16 and B1. This MAb can be used for immunophenotyping of leukemia and malignant cells, B lymphocyte detection in peripheral blood, B cell localization in tissues and B lymphocyte purification by immunosorbent methods. CD20 is a non-Ig differentiation antigen of B-cells and its expression is restricted to normal and neoplastic B-cells, being absent from all other leukocytes and tissues. CD20 is expressed by pre B-cells and persists during all stages of B-cell maturation but is lost upon terminal differentiation into plasma cells. Protein passes through the membrane 4 times with both ends in cytoplasm and exposes one short and one longer loop to the external environment. CD20 is not glycosylated in resting B cells and its cytoplasmic domains are differentially phosphorylated upon activation. It acts as a calcium channel involved in B-cell activation and cell cycle progression.
