

**Cytokeratin 19 (KRT19) (Pancreatic Stem Cell Marker) Antibody - With BSA and Azide
Mouse Monoclonal Antibody [Clone KRT19/799]
Catalog # AH11731**

Specification

**Cytokeratin 19 (KRT19) (Pancreatic Stem Cell Marker) Antibody - With BSA and Azide -
Product Information**

Application	,2,3,4,
Primary Accession	P08727
Other Accession	3880 , 654568
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	Mouse / IgG2a, kappa
Calculated MW	40kDa KDa

**Cytokeratin 19 (KRT19) (Pancreatic Stem Cell Marker) Antibody - With BSA and Azide -
Additional Information**

Gene ID 3880

Other Names

Keratin, type I cytoskeletal 19, Cytokeratin-19, CK-19, Keratin-19, K19, KRT19

Storage

Store at 2 to 8°C. Antibody is stable for 24 months.

Precautions

Cytokeratin 19 (KRT19) (Pancreatic Stem Cell Marker) Antibody - With BSA and Azide is for research use only and not for use in diagnostic or therapeutic procedures.

**Cytokeratin 19 (KRT19) (Pancreatic Stem Cell Marker) Antibody - With BSA and Azide -
Protein Information**

Name KRT19

Function

Involved in the organization of myofibers. Together with KRT8, helps to link the contractile apparatus to dystrophin at the costameres of striated muscle.

Tissue Location

Expressed in a defined zone of basal keratinocytes in the deep outer root sheath of hair follicles. Also observed in sweat gland and mammary gland ductal and secretory cells, bile ducts, gastrointestinal tract, bladder urothelium, oral epithelia, esophagus, ectocervical epithelium (at protein level). Expressed in epidermal basal cells, in nipple epidermis and a defined region of the hair follicle. Also seen in a subset of vascular wall cells in both the veins and artery of human umbilical cord, and in umbilical cord vascular smooth muscle. Observed in muscle fibers accumulating in the costameres of myoplasm at the sarcolemma in structures that contain

dystrophin and spectrin.

Cytokeratin 19 (KRT19) (Pancreatic Stem Cell Marker) Antibody - With BSA and Azide - Protocols

Provided below are standard protocols that you may find useful for product applications.

Formalin-fixed, paraffin-embedded human Bladder Carcinoma stained with Cytokeratin 19 Monoclonal Antibody (KRT19/799)

Formalin-fixed, paraffin-embedded human Cervical Carcinoma stained with Cytokeratin 19 Monoclonal Antibody (KRT19/799)

Formalin-fixed, paraffin-embedded human Endometrial Carcinoma stained with Cytokeratin 19 Monoclonal Antibody (KRT19/799)

Formalin-fixed, paraffin-embedded human Ovarian Carcinoma stained with Cytokeratin 19 Monoclonal Antibody (KRT19/799)

Formalin-fixed, paraffin-embedded human Pancreas stained with Cytokeratin 19 Monoclonal Antibody (KRT19/799)

Cytokeratin 19 (KRT19) (Pancreatic Stem Cell Marker) Antibody - With BSA and Azide - Background

Recognizes a protein of 40kDa, identified as cytokeratin-19 (CK19), which is expressed in sweat gland, mammary gland ductal and secretory cells, bile ducts, gastrointestinal tract, bladder urothelium, oral epithelia, esophagus, and ectocervical epithelium. Anti-CK19 reacts with a wide variety of epithelial malignancies including adenocarcinomas of the colon, stomach, pancreas, biliary tract, liver, and breast. Perhaps the most useful application is the identification of thyroid carcinoma of the papillary type, although 50%-60% of follicular carcinomas are also labeled.

Anti-CK19 is a useful marker for detection of tumor cells in lymph nodes, peripheral blood, bone marrow and breast cancer.
