

Vimentin (Mesenchymal Cell Marker) Antibody - With BSA and Azide
Mouse Monoclonal Antibody [Clone LN-6]
Catalog # AH12516

Specification

Vimentin (Mesenchymal Cell Marker) Antibody - With BSA and Azide - Product Information

Application	,14,3,4,
Primary Accession	P08670
Other Accession	7431 , 455493
Reactivity	Human, Mouse, Rat, Rabbit, Pig, Bovine, Sheep, Cat
Host	Mouse
Clonality	Monoclonal
Isotype	Mouse / IgM
Calculated MW	57-60kDa KDa

Vimentin (Mesenchymal Cell Marker) Antibody - With BSA and Azide - Additional Information

Gene ID 7431

Other Names
Vimentin, VIM

Storage
Store at 2 to 8°C. Antibody is stable for 24 months.

Precautions
Vimentin (Mesenchymal Cell Marker) Antibody - With BSA and Azide is for research use only and not for use in diagnostic or therapeutic procedures.

Vimentin (Mesenchymal Cell Marker) Antibody - With BSA and Azide - Protein Information

Name VIM ([HGNC:12692](#))

Function
Vimentins are class-III intermediate filaments found in various non-epithelial cells, especially mesenchymal cells. Vimentin is attached to the nucleus, endoplasmic reticulum, and mitochondria, either laterally or terminally. Plays a role in cell directional movement, orientation, cell sheet organization and Golgi complex polarization at the cell migration front (By similarity). Protects SCRIB from proteasomal degradation and facilitates its localization to intermediate filaments in a cell contact-mediated manner (By similarity).

Cellular Location
Cytoplasm. Cytoplasm, cytoskeleton. Nucleus matrix {ECO:0000250|UniProtKB:P31000}. Cell membrane {ECO:0000250|UniProtKB:P20152}

Tissue Location

Highly expressed in fibroblasts, some expression in T- and B-lymphocytes, and little or no expression in Burkitt's lymphoma cell lines. Expressed in many hormone-independent mammary carcinoma cell lines.

Vimentin (Mesenchymal Cell Marker) Antibody - With BSA and Azide - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Formalin-fixed, paraffin-embedded human Melanoma stained with Vimentin Monoclonal Antibody (LN-6).

Vimentin (Mesenchymal Cell Marker) Antibody - With BSA and Azide - Background

This MAb reacts with a 58kDa protein identified as vimentin. It reacts with a non-hematopoietic epitope of vimentin and shows no cross-reaction with other closely related intermediate filament proteins (IFP[™]s) such as desmin, keratin, neurofilament, and glial fibrillary acid protein. Vimentin is ubiquitously expressed in mesenchymal cells such as fibroblasts, smooth muscle cells, and endothelium. Antibody against vimentin is useful as part of an antibody panel for differential diagnosis of tumors of unknown origin. Ab-2 does not react with leukocyte common antigen-positive tissues such as lymphomas and leukemias.
