**Cytokeratin 5/8 Antibody - With BSA and Azide - Protein Information**

**Name** KRT5

**Function**

Required for the formation of keratin intermediate filaments in the basal epidermis and maintenance of the skin barrier in response to mechanical stress (By similarity). Regulates the recruitment of Langerhans cells to the epidermis, potentially by modulation of the abundance of macrophage chemotactic cytokines, macrophage inflammatory cytokines and CTNND1 localization in keratinocytes (By similarity).

**Cellular Location**

Cytoplasm.

**Tissue Location**

Expressed in corneal epithelium (at protein level) (PubMed:26758872). Expressed in keratinocytes

(at protein level) (PubMed:20128788, PubMed:31302245).

### **Cytokeratin 5/8 Antibody - With BSA and Azide - Background**

It reacts with keratin 5 (58kDa) and keratin 8 (52.5kDa). Simple epithelia express cytoke­ratin 8 in combination with 18. On the other hand, basal cells of stratified epithelia express cytoke­ratin 5 paired with 14. This antibody therefore, reacts with a wide range of epithelia and their carcinomas.
