DBP antibody - N-terminal region - Protein Information

Name DBP

Function

This transcriptional activator recognizes and binds to the sequence 5'-RTTAYGTAA-3' found in the promoter of genes such as albumin, CYP2A4 and CYP2A5. It is not essential for circadian rhythm generation, but modulates important clock output genes. May be a direct target for regulation by the circadian pacemaker component clock. May affect circadian period and sleep regulation.

Cellular Location

Nucleus.

Tissue Location

Ubiquitously expressed. Expressed in the suprachiasmatic nuclei (SCN) and in most peripheral tissues, with a strong circadian rhythmicity
