

**MCM3 antibody - C-terminal region**  
**Rabbit Polyclonal Antibody**  
**Catalog # AI11009****Specification**

---

**MCM3 antibody - C-terminal region - Product Information**

Application	WB
Primary Accession	<a href="#">P25205</a>
Other Accession	<a href="#">NM_002388</a> , <a href="#">NP_002379</a>
Reactivity	Human, Mouse, Rat, Rabbit, Horse, Yeast, Bovine, Dog
Predicted	Human, Mouse, Rat, Chicken, Horse, Bovine
Host	Rabbit
Clonality	Polyclonal
Calculated MW	91kDa kDa

**MCM3 antibody - C-terminal region - Additional Information****Gene ID** 4172**Alias Symbol** HCC5, MGC1157, P1-MCM3, P1.h, RLFB**Other Names**

DNA replication licensing factor MCM3, 3.6.4.12, DNA polymerase alpha holoenzyme-associated protein P1, P1-MCM3, RLF subunit beta, p102, MCM3

**Format**

Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose.

**Reconstitution & Storage**

Add 50 ul of distilled water. Final anti-MCM3 antibody concentration is 1 mg/ml in PBS buffer with 2% sucrose. For longer periods of storage, store at 20°C. Avoid repeat freeze-thaw cycles.

**Precautions**

MCM3 antibody - C-terminal region is for research use only and not for use in diagnostic or therapeutic procedures.

**MCM3 antibody - C-terminal region - Protein Information****Name** MCM3 ([HGNC:6945](#))**Function**

Acts as a component of the MCM2-7 complex (MCM complex) which is the replicative helicase essential for 'once per cell cycle' DNA replication initiation and elongation in eukaryotic cells. Core component of CDC45-MCM-GINS (CMG) helicase, the molecular machine that unwinds template DNA during replication, and around which the replisome is built (PubMed:&lt;a href="http://www.uniprot.org/citations/32453425" target="\_blank"&gt;32453425&lt;/a&gt;, PubMed:&lt;a href="http://www.uniprot.org/citations/34694004" target="\_blank"&gt;34694004&lt;/a&gt;, PubMed:&lt;a href="http://www.uniprot.org/citations/34694004" target="\_blank"&gt;34694004&lt;/a&gt;).

href="http://www.uniprot.org/citations/34700328" target="\_blank">34700328</a>, PubMed:<a href="http://www.uniprot.org/citations/35585232" target="\_blank">35585232</a>). The active ATPase sites in the MCM2-7 ring are formed through the interaction surfaces of two neighboring subunits such that a critical structure of a conserved arginine finger motif is provided in trans relative to the ATP-binding site of the Walker A box of the adjacent subunit. The six ATPase active sites, however, are likely to contribute differentially to the complex helicase activity (PubMed:<a href="http://www.uniprot.org/citations/32453425" target="\_blank">32453425</a>). Required for the entry in S phase and for cell division (Probable).

#### Cellular Location

Nucleus. Chromosome. Note=Associated with chromatin before the formation of nuclei and detaches from it as DNA replication progresses.

#### MCM3 antibody - C-terminal region - Protocols

Provided below are standard protocols that you may find useful for product applications.

WB Suggested Anti-MCM3 Antibody Titration: 0.2-1 µg/ml

ELISA Titer: 1:312500

Positive Control: 721\_B cell lysate

MCM3 is supported by BioGPS gene expression data to be expressed in 721\_B
