SEMG1 antibody - N-terminal region - Protein Information**Name** SEMG1**Synonyms** SEMG**Function**

Predominant protein in semen. It participates in the formation of a gel matrix entrapping the accessory gland secretions and ejaculated spermatozoa. Fragments of semenogelin and/or fragments of the related proteins may contribute to the activation of progressive sperm movements as the gel-forming proteins are fragmented by KLK3/PSA.

Cellular Location

Secreted.

Tissue Location

Seminal vesicle.
