

**PCNA / Cyclin Antibody (Internal)**  
**Rabbit Polyclonal Antibody**  
**Catalog # ALS11344**

**Specification**

---

**PCNA / Cyclin Antibody (Internal) - Product Information**

|                   |  |
|-------------------|--|
| Application       | IHC, WB  |
| Primary Accession | <a href="#">P12004</a>   |
| Reactivity        | Human, Mouse, Rat, Monkey, Chicken, Xenopus, Bovine, Fish, Dog |
| Host              | Rabbit   |
| Clonality         | Polyclonal   |
| Calculated MW     | 29kDa KDa  |

**PCNA / Cyclin Antibody (Internal) - Additional Information**

**Gene ID** 5111

**Other Names**

Proliferating cell nuclear antigen, PCNA, Cyclin, PCNA

**Target/Specificity**

An internal region of human PCNA protein.

**Reconstitution & Storage**

+4°C or -20°C, Avoid repeated freezing and thawing.

**Precautions**

PCNA / Cyclin Antibody (Internal) is for research use only and not for use in diagnostic or therapeutic procedures.

**PCNA / Cyclin Antibody (Internal) - Protein Information**

**Name** PCNA

**Function**

Auxiliary protein of DNA polymerase delta and epsilon, is involved in the control of eukaryotic DNA replication by increasing the polymerase's processibility during elongation of the leading strand (PubMed:<a href="http://www.uniprot.org/citations/35585232" target="\_blank">35585232</a>). Induces a robust stimulatory effect on the 3'-5' exonuclease and 3'-phosphodiesterase, but not apurinic-apyrimidinic (AP) endonuclease, APEX2 activities. Has to be loaded onto DNA in order to be able to stimulate APEX2. Plays a key role in DNA damage response (DDR) by being conveniently positioned at the replication fork to coordinate DNA replication with DNA repair and DNA damage tolerance pathways (PubMed:<a href="http://www.uniprot.org/citations/24939902" target="\_blank">24939902</a>). Acts as a loading platform to recruit DDR proteins that allow completion of DNA replication after DNA damage and promote postreplication repair: Monoubiquitinated PCNA leads to recruitment of translesion (TLS) polymerases, while 'Lys-63'-linked polyubiquitination of PCNA is involved in error-free pathway and employs

recombination mechanisms to synthesize across the lesion (PubMed:<a href="http://www.uniprot.org/citations/24695737" target="\_blank">24695737</a>).

#### Cellular Location

Nucleus. Note=Colocalizes with CREBBP, EP300 and POLD1 to sites of DNA damage (PubMed:24939902). Forms nuclear foci representing sites of ongoing DNA replication and vary in morphology and number during S phase (PubMed:15543136). Co-localizes with SMARCA5/SNF2H and BAZ1B/WSTF at replication foci during S phase (PubMed:15543136). Together with APEX2, is redistributed in discrete nuclear foci in presence of oxidative DNA damaging agents

#### Volume

50 µl

#### PCNA / Cyclin Antibody (Internal) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
