

**BAX Antibody (clone 6A7)**  
**Mouse Monoclonal Antibody**  
**Catalog # ALS12297****Specification**

---

**BAX Antibody (clone 6A7) - Product Information**

Application	WB, IHC
Primary Accession	<a href="#">Q07812</a>
Reactivity	Human, Mouse, Rat, Monkey
Host	Mouse
Clonality	Monoclonal
Calculated MW	21kDa KDa

**BAX Antibody (clone 6A7) - Additional Information****Gene ID** 581**Other Names**

Apoptosis regulator BAX, Bcl-2-like protein 4, Bcl2-L-4, BAX, BCL2L4

**Target/Specificity**

Amino acid:12-24 common to human, mouse, and rat Bax protein.

**Reconstitution & Storage**

+4°C. Store undiluted.

**Precautions**

BAX Antibody (clone 6A7) is for research use only and not for use in diagnostic or therapeutic procedures.

**BAX Antibody (clone 6A7) - Protein Information****Name** BAX**Synonyms** BCL2L4**Function**

Plays a role in the mitochondrial apoptotic process (PubMed: [10772918](http://www.uniprot.org/citations/10772918)), PubMed: [11060313](http://www.uniprot.org/citations/11060313), PubMed: [16113678](http://www.uniprot.org/citations/16113678), PubMed: [16199525](http://www.uniprot.org/citations/16199525), PubMed: [18948948](http://www.uniprot.org/citations/18948948), PubMed: [21199865](http://www.uniprot.org/citations/21199865), PubMed: [21458670](http://www.uniprot.org/citations/21458670), PubMed: [25609812](http://www.uniprot.org/citations/25609812), PubMed: [36361894](http://www.uniprot.org/citations/36361894), PubMed: [8358790](http://www.uniprot.org/citations/8358790)), PubMed: <a

[8521816](http://www.uniprot.org/citations/8521816)). Under normal conditions, BAX is largely cytosolic via constant retrotranslocation from mitochondria to the cytosol mediated by BCL2L1/Bcl-xL, which avoids accumulation of toxic BAX levels at the mitochondrial outer membrane (MOM) (PubMed:[21458670](http://www.uniprot.org/citations/21458670)). Under stress conditions, undergoes a conformation change that causes translocation to the mitochondrion membrane, leading to the release of cytochrome c that then triggers apoptosis (PubMed:[10772918](http://www.uniprot.org/citations/10772918), PubMed:[11060313](http://www.uniprot.org/citations/11060313), PubMed:[16113678](http://www.uniprot.org/citations/16113678), PubMed:[16199525](http://www.uniprot.org/citations/16199525), PubMed:[18948948](http://www.uniprot.org/citations/18948948), PubMed:[21199865](http://www.uniprot.org/citations/21199865), PubMed:[21458670](http://www.uniprot.org/citations/21458670), PubMed:[25609812](http://www.uniprot.org/citations/25609812), PubMed:[8358790](http://www.uniprot.org/citations/8358790), PubMed:[8521816](http://www.uniprot.org/citations/8521816)). Promotes activation of CASP3, and thereby apoptosis (PubMed:[10772918](http://www.uniprot.org/citations/10772918), PubMed:[11060313](http://www.uniprot.org/citations/11060313), PubMed:[16113678](http://www.uniprot.org/citations/16113678), PubMed:[16199525](http://www.uniprot.org/citations/16199525), PubMed:[18948948](http://www.uniprot.org/citations/18948948), PubMed:[21199865](http://www.uniprot.org/citations/21199865), PubMed:[21458670](http://www.uniprot.org/citations/21458670), PubMed:[25609812](http://www.uniprot.org/citations/25609812), PubMed:[8358790](http://www.uniprot.org/citations/8358790), PubMed:[8521816](http://www.uniprot.org/citations/8521816)).

### Cellular Location

[Isoform Alpha]: Mitochondrion outer membrane; Single-pass membrane protein. Cytoplasm. Nucleus Note=Colocalizes with 14-3-3 proteins in the cytoplasm. Under stress conditions, undergoes a conformation change that causes release from JNK-phosphorylated 14-3-3 proteins and translocation to the mitochondrion membrane. Upon Sendai virus infection, recruited to the mitochondrion through interaction with IRF3 (PubMed:25609812) [Isoform Gamma]: Cytoplasm.

### Tissue Location

Expressed in a wide variety of tissues. Isoform Psi is found in glial tumors. Isoform Alpha is expressed in spleen, breast, ovary, testis, colon and brain, and at low levels in skin and lung. Isoform Sigma is expressed in spleen, breast, ovary, testis, lung, colon, brain and at low levels in skin. Isoform Alpha and isoform Sigma are expressed in pro-myelocytic leukemia, histiocytic lymphoma, Burkitt's lymphoma, T-cell lymphoma, lymphoblastic leukemia, breast adenocarcinoma, ovary adenocarcinoma, prostate carcinoma, prostate adenocarcinoma, lung carcinoma, epidermoid carcinoma, small cell lung carcinoma and colon adenocarcinoma cell lines

### BAX Antibody (clone 6A7) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)

- [Flow Cytometry](#)
- [Cell Culture](#)

### **BAX Antibody (clone 6A7) - Images**

Extracts from HeLa cell lysate was immunoprecipitated with clone 6A7 (lane 1), 4 ug purified...

Anti-BAX antibody IHC of human kidney.

### **BAX Antibody (clone 6A7) - Background**

Accelerates programmed cell death by binding to, and antagonizing the apoptosis repressor BCL2 or its adenovirus homolog E1B 19k protein. Under stress conditions, undergoes a conformation change that causes translocation to the mitochondrion membrane, leading to the release of cytochrome c that then triggers apoptosis. Promotes activation of CASP3, and thereby apoptosis.
