

HEP / EPHB6 Antibody (aa831-843)
Goat Polyclonal Antibody
Catalog # ALS13859

Specification

HEP / EPHB6 Antibody (aa831-843) - Product Information

Application	IHC
Primary Accession	O15197
Reactivity	Human, Dog
Host	Goat
Clonality	Polyclonal
Calculated MW	111kDa KDa

HEP / EPHB6 Antibody (aa831-843) - Additional Information

Gene ID 2051

Other Names

Ephrin type-B receptor 6, HEP, Tyrosine-protein kinase-defective receptor EPH-6, EPHB6

Target/Specificity

Human EPHB6.

Reconstitution & Storage

Store at -20°C. Minimize freezing and thawing.

Precautions

HEP / EPHB6 Antibody (aa831-843) is for research use only and not for use in diagnostic or therapeutic procedures.

HEP / EPHB6 Antibody (aa831-843) - Protein Information

Name EPHB6

Function

Kinase-defective receptor for members of the ephrin-B family. Binds to ephrin-B1 and ephrin-B2. Modulates cell adhesion and migration by exerting both positive and negative effects upon stimulation with ephrin-B2. Inhibits JNK activation, T-cell receptor-induced IL-2 secretion and CD25 expression upon stimulation with ephrin-B2.

Cellular Location

Membrane; Single-pass type I membrane protein.

Tissue Location

Expressed in brain. Expressed in non invasive breast carcinoma cell lines (at protein level). Strong expression in brain and pancreas, and weak expression in other tissues, such as heart, placenta, lung, liver, skeletal muscle and kidney. Expressed in breast non invasive tumors but not in metastatic lesions. Isoform 3 is expressed in cell lines of glioblastomas, anaplastic astrocytomas,

gliosarcomas and astrocytomas. Isoform 3 is not detected in normal tissues.

HEP / EPHB6 Antibody (aa831-843) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

HEP / EPHB6 Antibody (aa831-843) - Images

Anti-EPHB6 antibody IHC of human brain, cerebellum.

Anti-EPHB6 antibody IHC of human small intestine.

HEP / EPHB6 Antibody (aa831-843) - Background

Kinase-defective receptor for members of the ephrin-B family. Binds to ephrin-B1 and ephrin-B2. Modulates cell adhesion and migration by exerting both positive and negative effects upon stimulation with ephrin-B2. Inhibits JNK activation, T-cell receptor-induced IL-2 secretion and CD25 expression upon stimulation with ephrin-B2.
