

INHA / Inhibin Alpha Antibody
Rabbit Polyclonal Antibody
Catalog # ALS13903

Specification

INHA / Inhibin Alpha Antibody - Product Information

Application	IHC
Primary Accession	P05111
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Calculated MW	40kDa KDa

INHA / Inhibin Alpha Antibody - Additional Information

Gene ID 3623

Other Names

Inhibin alpha chain, INHA

Reconstitution & Storage

Store at 2°C to 8°C degrees. Do not freeze.

Precautions

INHA / Inhibin Alpha Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

INHA / Inhibin Alpha Antibody - Protein Information

Name INHA

Function

Inhibins and activins inhibit and activate, respectively, the secretion of follitropin by the pituitary gland. Inhibins/activins are involved in regulating a number of diverse functions such as hypothalamic and pituitary hormone secretion, gonadal hormone secretion, germ cell development and maturation, erythroid differentiation, insulin secretion, nerve cell survival, embryonic axial development or bone growth, depending on their subunit composition. Inhibins appear to oppose the functions of activins.

Cellular Location

Secreted.

Tissue Location

Originally found in ovary (granulosa cells) and testis (Sertoli cells), but widely distributed in many tissues including brain and placenta. In adrenal cortex expression is limited to the zona reticularis and the innermost zona fasciculata in the normal gland, extending centripetally into the zona fasciculata in hyperplasia. Also found in adrenocortical tumors. Also expressed in prostate epithelium of benign prostatic hyperplasia, in regions of basal cell hyperplasia and in

nonmalignant regions of high grade prostate cancer. Only circulating inhibin B is found in male, whereas circulating inhibins A and B are found in female

Volume
50 µl

INHA / Inhibin Alpha Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
