

ATG14 Antibody (Internal)
Rabbit Polyclonal Antibody
Catalog # ALS15664**Specification**

ATG14 Antibody (Internal) - Product Information

Application	IHC, IF
Primary Accession	O6ZNE5
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Calculated MW	55kDa KDa

ATG14 Antibody (Internal) - Additional Information**Gene ID** 22863**Other Names**

Beclin 1-associated autophagy-related key regulator, Barkor, Autophagy-related protein 14-like protein, Atg14L, ATG14, KIAA0831

Target/Specificity

Human ATG14. At least three isoforms of ATG14 are known to exist; this antibody will detect all three isoforms.

Reconstitution & Storage

Long term: -20°C; Short term: +4°C. Avoid repeat freeze-thaw cycles.

Precautions

ATG14 Antibody (Internal) is for research use only and not for use in diagnostic or therapeutic procedures.

ATG14 Antibody (Internal) - Protein Information**Name** ATG14 {ECO:0000303|PubMed:18843052}**Function**Required for both basal and inducible autophagy. Determines the localization of the autophagy-specific PI3-kinase complex PI3KC3-C1 (PubMed: [18843052](http://www.uniprot.org/citations/18843052), PubMed: [19050071](http://www.uniprot.org/citations/19050071)). Plays a role in autophagosome formation and MAP1LC3/LC3 conjugation to phosphatidylethanolamine (PubMed: [19270696](http://www.uniprot.org/citations/19270696), PubMed: [20713597](http://www.uniprot.org/citations/20713597)). Promotes BECN1 translocation from the trans-Golgi network to autophagosomes (PubMed: [20713597](http://www.uniprot.org/citations/20713597)). Enhances PIK3C3 activity in a BECN1-dependent manner. Essential for the autophagy-dependent phosphorylation of BECN1 (PubMed: [23878393](http://www.uniprot.org/citations/23878393))

target="_blank">23878393). Stimulates the phosphorylation of BECN1, but suppresses the phosphorylation PIK3C3 by AMPK (PubMed:23878393). Binds to STX17-SNAP29 binary t-SNARE complex on autophagosomes and primes it for VAMP8 interaction to promote autophagosome-endolysosome fusion (PubMed:25686604, PubMed:37632749). Modulates the hepatic lipid metabolism (By similarity).

Cellular Location

Cytoplasm. Endoplasmic reticulum membrane; Peripheral membrane protein. Preautophagosomal structure membrane; Peripheral membrane protein. Cytoplasmic vesicle, autophagosome membrane; Peripheral membrane protein. Note=Cytosolic under nutrient-rich conditions (PubMed:19050071). Following autophagy stimuli, such as starvation or rapamycin induction, predominantly detected in cytoplasmic foci, identified as isolation membranes and autophagosomes (PubMed:19050071). Accumulates on highly curved PtdIns(3)P enriched autophagic membrane via its BATS domain to sense and maintain membrane curvature (By similarity). Localizes also to discrete punctae along the ciliary axoneme and to the base of the ciliary axoneme (By similarity). {ECO:0000250|UniProtKB:Q8CDJ3}

ATG14 Antibody (Internal) - Protocols

Provided below are standard protocols that you may find useful for product applications.

Anti-ATG14 antibody IHC staining of human skin.

Immunofluorescence of ATG14 in human small intestine tissue with ATG14 antibody at 20 ug/ml.

ATG14 Antibody (Internal) - Background

Required for both basal and inducible autophagy. Determines the localization of the autophagy-specific PI3-kinase complex. Plays a role in autophagosome formation and MAP1LC3/LC3 conjugation to phosphatidylethanolamine. Promotes BECN1 translocation from the trans-Golgi network to autophagosomes. Enhances PIK3C3 activity in a BECN1-dependent manner.
