

ATG16L1 Antibody
Purified Mouse Monoclonal Antibody (Mab)
Catalog # AM1817b**Specification**

ATG16L1 Antibody - Product Information

Application	WB, IHC-P,E
Primary Accession	Q676U5
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgG1, κ

ATG16L1 Antibody - Additional Information**Gene ID** 55054**Other Names**

Autophagy-related protein 16-1, APG16-like 1, ATG16L1, APG16L

Target/Specificity

Purified His-tagged ATG16L1 protein(Fragment) was used to produced this monoclonal antibody.

Dilution

WB~~1:60

IHC-P~~1:10~50

Format

Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

ATG16L1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

ATG16L1 Antibody - Protein Information**Name** ATG16L1 {ECO:0000303|PubMed:17200669, ECO:0000312|HGNC:HGNC:21498}**Function** Plays an essential role in both canonical and non-canonical autophagy: interacts with ATG12-ATG5 to mediate the lipidation to ATG8 family proteins (MAP1LC3A, MAP1LC3B, MAP1LC3C, GABARAPL1, GABARAPL2 and GABARAP) (PubMed:[23376921](#), PubMed:[23392225](#), PubMed:[24553140](#), PubMed:[24954904](#), PubMed:[27273576](#), PubMed:[29317426](#), PubMed:[30778222](#), PubMed:[33909989](#)). Acts as a molecular hub, coordinating autophagy pathways via distinct domains that support either canonical or non- canonical signaling

(PubMed:[29317426](#), PubMed:[30778222](#)). During canonical autophagy, interacts with ATG12-ATG5 to mediate the conjugation of phosphatidylethanolamine (PE) to ATG8 proteins, to produce a membrane-bound activated form of ATG8 (PubMed:[23376921](#), PubMed:[23392225](#), PubMed:[24553140](#), PubMed:[24954904](#), PubMed:[27273576](#)). Thereby, controls the elongation of the nascent autophagosomal membrane (PubMed:[23376921](#), PubMed:[23392225](#), PubMed:[24553140](#), PubMed:[24954904](#), PubMed:[27273576](#)). As part of the ATG8 conjugation system with ATG5 and ATG12, required for recruitment of LRRK2 to stressed lysosomes and induction of LRRK2 kinase activity in response to lysosomal stress (By similarity). Also involved in non-canonical autophagy, a parallel pathway involving conjugation of ATG8 proteins to single membranes at endolysosomal compartments, probably by catalyzing conjugation of phosphatidylserine (PS) to ATG8 (PubMed:[33909989](#)). Non-canonical autophagy plays a key role in epithelial cells to limit lethal infection by influenza A (IAV) virus (By similarity). Regulates mitochondrial antiviral signaling (MAVS)-dependent type I interferon (IFN-I) production (PubMed:[22749352](#), PubMed:[25645662](#)). Negatively regulates NOD1- and NOD2-driven inflammatory cytokine response (PubMed:[24238340](#)). Instead, promotes an autophagy-dependent antibacterial pathway together with NOD1 or NOD2 (PubMed:[20637199](#)). Plays a role in regulating morphology and function of Paneth cell (PubMed:[18849966](#)).

Cellular Location

Cytoplasm. Preautophagosomal structure membrane; Peripheral membrane protein. Endosome membrane; Peripheral membrane protein. Lysosome membrane; Peripheral membrane protein. Note=Recruited to omegasomes membranes by WIPI2 (By similarity). Omegasomes are endoplasmic reticulum connected structures at the origin of preautophagosomal structures (By similarity) Localized to preautophagosomal structure (PAS) where it is involved in the membrane targeting of ATG5 (By similarity). Localizes also to discrete punctae along the ciliary axoneme (By similarity). Upon activation of non-canonical autophagy, recruited to single-membrane endolysosomal compartments (PubMed:[29317426](#)) {ECO:0000250|UniProtKB:Q8C0J2, ECO:0000269|PubMed:[29317426](#)}

ATG16L1 Antibody - Images

Western blot analysis of anti-ATG16L1 Monoclonal Antibody (Cat.#AM1817b) by ATG16L1 recombinant protein (Fragment). ATG16L1 (Fragment) protein (arrow) was detected using the purified Mab. (1:2000)

Formalin-fixed and paraffin-embedded human lung carcinoma tissue reacted with ATG16L1 Monoclonal Antibody (Cat.#AM1817b), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

ATG16L1 Antibody - Background

The protein encoded by this gene is part of a large protein complex that is necessary for autophagy, the major process by which intracellular components are targeted to lysosomes for degradation. Defects in this gene are a cause of susceptibility to inflammatory bowel disease type 10 (IBD10). Several transcript variants encoding different isoforms have been found for this gene.
