

**PAX6 Antibody (Ascites)**  
**Mouse Monoclonal Antibody (Mab)**  
**Catalog # AM1871a**

## Specification

---

### PAX6 Antibody (Ascites) - Product Information

Application	IF, WB,E
Primary Accession	<a href="#">P26367</a>
Other Accession	<a href="#">P63015</a> , <a href="#">Q1LZF1</a> , <a href="#">NP_000271.1</a> , <a href="#">NP_001595.2</a>
Reactivity	Human
Predicted	Bovine, Mouse
Host	Mouse
Clonality	Monoclonal
Isotype	IgM,K
Calculated MW	46683

### PAX6 Antibody (Ascites) - Additional Information

**Gene ID** 5080

#### Other Names

Paired box protein Pax-6, Aniridia type II protein, Oculorhombin, PAX6, AN2

#### Target/Specificity

This PAX6 Monoclonal antibody was raised using purified His-tagged recombinant human PAX6.

#### Dilution

IF~~1:10~50  
WB~~1:500~16000

#### Format

Mouse monoclonal antibody supplied in crude ascites with 0.09% (W/V) sodium azide.

#### Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### Precautions

PAX6 Antibody (Ascites) is for research use only and not for use in diagnostic or therapeutic procedures.

### PAX6 Antibody (Ascites) - Protein Information

**Name** PAX6

**Synonyms** AN2

**Function** Transcription factor with important functions in the development of the eye, nose,

central nervous system and pancreas. Required for the differentiation of pancreatic islet alpha cells (By similarity). Competes with PAX4 in binding to a common element in the glucagon, insulin and somatostatin promoters. Regulates specification of the ventral neuron subtypes by establishing the correct progenitor domains (By similarity). Acts as a transcriptional repressor of NFATC1- mediated gene expression (By similarity).

#### Cellular Location

Nucleus {ECO:0000250|UniProtKB:P63015}. [Isoform 5a]: Nucleus {ECO:0000250|UniProtKB:P63016}

#### Tissue Location

[Isoform 1]: Expressed in lymphoblasts.

### PAX6 Antibody (Ascites) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

### PAX6 Antibody (Ascites) - Images

Confocal immunofluorescent analysis of PAX6 Antibody (Ascites)(Cat#AM1871a) with HeLa cell followed by Alexa Fluor® 488-conjugated goat anti-mouse IgG (green). Actin filaments have been labeled with Alexa Fluor 555 phalloidin (red). DAPI was used to stain the cell nuclear (blue).

PAX6 (Cat. #AM1871a) western blot analysis in 293 cell line lysates (35µg/lane). This demonstrates the PAX6 antibody detected the PAX6 protein (arrow).

#### **PAX6 Antibody (Ascites) - Background**

This gene encodes paired box gene 6, one of many human homologs of the *Drosophila melanogaster* gene *prd*. In addition to the hallmark feature of this gene family, a conserved paired box domain, the encoded protein also contains a homeo box domain. Both domains are known to bind DNA, and function as regulators of gene transcription. This gene is expressed in the developing nervous system, and in developing eyes. Mutations in this gene are known to cause ocular disorders such as aniridia and Peter's anomaly. Alternatively spliced transcript variants encoding either the same or different isoform have been found for this gene. [provided by RefSeq].
