

HAGH Antibody (C-term) (Ascites)
Mouse Monoclonal Antibody (Mab)
Catalog # AM2159a

Specification

HAGH Antibody (C-term) (Ascites) - Product Information

Application	WB,E
Primary Accession	Q16775
Other Accession	NP_005317.2
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgG1
Calculated MW	33806
Antigen Region	279-308

HAGH Antibody (C-term) (Ascites) - Additional Information

Gene ID 3029

Other Names

Hydroxyacylglutathione hydrolase, mitochondrial, Glyoxalase II, Glx II, HAGH, GLO2, HAGH1

Target/Specificity

This HAGH antibody is generated from mice immunized with a KLH conjugated synthetic peptide between 279-308 amino acids from the C-terminal region of human HAGH.

Dilution

WB~~1:100~1600

Format

Mouse monoclonal antibody supplied in crude ascites with 0.09% (W/V) sodium azide.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

HAGH Antibody (C-term) (Ascites) is for research use only and not for use in diagnostic or therapeutic procedures.

HAGH Antibody (C-term) (Ascites) - Protein Information

Name HAGH

Synonyms GLO2, HAGH1

Function Thiolesterase that catalyzes the hydrolysis of S-D-lactoyl- glutathione to form

glutathione and D-lactic acid.

Cellular Location

[Isoform 1]: Mitochondrion matrix

Tissue Location

Expressed in liver and kidney.

HAGH Antibody (C-term) (Ascites) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

HAGH Antibody (C-term) (Ascites) - Images

HAGH Antibody (C-term)(Ascites)(Cat. #AM2159a) western blot analysis in Jurkat cell line lysates (35µg/lane). This demonstrates the HAGH antibody detected the HAGH protein (arrow).

HAGH Antibody (C-term) (Ascites) - Background

The enzyme encoded by this gene is classified as a thiolesterase and is responsible for the hydrolysis of S-lactoyl-glutathione to reduced glutathione and D-lactate. Two transcript variants encoding different isoforms have been found for this gene.
