

**NFKBIA Antibody**  
**Mouse Monoclonal Antibody (Mab)**  
**Catalog # AM2205b****Specification**

---

**NFKBIA Antibody - Product Information**

Application	<b>WB,E</b>
Primary Accession	<a href="#">P25963</a>
Reactivity	<b>Human</b>
Host	<b>Mouse</b>
Clonality	<b>Monoclonal</b>
Isotype	<b>IgG1,<math>\kappa</math></b>
Calculated MW	<b>35609</b>

**NFKBIA Antibody - Additional Information****Gene ID** 4792**Other Names**NF-kappa-B inhibitor alpha, I-kappa-B-alpha, I $\kappa$ B-alpha, I $\kappa$ B $\alpha$ , Major histocompatibility complex enhancer-binding protein MAD3, NFKBIA, IKBA, MAD3, NFKBI**Target/Specificity**

Purified His-tagged NFKBIA protein was used to produced this monoclonal antibody.

**Dilution**

WB~~1:1000

**Format**

Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, followed by dialysis against PBS.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

NFKBIA Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**NFKBIA Antibody - Protein Information****Name** NFKBIA**Synonyms** IKBA, MAD3, NFKBI**Function** Inhibits the activity of dimeric NF-kappa-B/REL complexes by trapping REL (RELA/p65 and NFKB1/p50) dimers in the cytoplasm by masking their nuclear localization signals (PubMed:[1493333](#), PubMed:[36651806](#), PubMed:[7479976](#)). On cellular stimulation by immune and

pro-inflammatory responses, becomes phosphorylated promoting ubiquitination and degradation, enabling the dimeric RELA to translocate to the nucleus and activate transcription (PubMed:[7479976](#), PubMed:[7628694](#), PubMed:[7796813](#), PubMed:[7878466](#)).

#### Cellular Location

Cytoplasm. Nucleus. Note=Shuttles between the nucleus and the cytoplasm by a nuclear localization signal (NLS) and a CRM1-dependent nuclear export.

#### NFKBIA Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

#### NFKBIA Antibody - Images

NFKBIA Antibody (Cat. #AM2205b) western blot analysis in HeLa, mouse NIH/3T3 cell line lysates (35µg/lane). This demonstrates the NFKBIA antibody detected the NFKBIA protein (arrow).

#### NFKBIA Antibody - Background

Inhibits the activity of dimeric NF-kappa-B/REL complexes by trapping REL dimers in the cytoplasm through masking of their nuclear localization signals. On cellular stimulation by immune and proinflammatory responses, becomes phosphorylated promoting ubiquitination and degradation, enabling the dimeric RELA to translocate to the nucleus and activate transcription.
