

Gab1 Antibody (Ascites)
Mouse Monoclonal Antibody (Mab)
Catalog # AM3111a**Specification**

Gab1 Antibody (Ascites) - Product Information

| | |
|-------------------|------------------------|
| Application | WB,E |
| Primary Accession | O13480 |
| Reactivity | Human |
| Host | Mouse |
| Clonality | Monoclonal |
| Isotype | Mouse IgG1 |

Gab1 Antibody (Ascites) - Additional Information**Gene ID** 2549**Other Names**

GRB2-associated-binding protein 1, GRB2-associated binder 1, Growth factor receptor bound protein 2-associated protein 1, GAB1

Target/Specificity

This Gab1 antibody is generated from mice immunized with a GST fusion protein encoding full length human GAB1.

Dilution

WB~~1:1000

Format

Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Gab1 Antibody (Ascites) is for research use only and not for use in diagnostic or therapeutic procedures.

Gab1 Antibody (Ascites) - Protein Information**Name** GAB1**Function** Adapter protein that plays a role in intracellular signaling cascades triggered by activated receptor-type kinases. Plays a role in FGFR1 signaling. Probably involved in signaling by the epidermal growth factor receptor (EGFR) and the insulin receptor (INSR). Involved in the MET/HGF-signaling pathway (PubMed:[29408807](#)).

Gab1 Antibody (Ascites) - Protocols

Provided below are standard protocols that you may find useful for product applications.

Gab1 Antibody (Ascites) - Images

Wild-type (+/+) and Gab1^{-/-} (-/-) cells were heat shocked (HS) at 42°C for 1 h or irradiated with UV-B light (400 J/m²) and then incubated at 37°C for 1 h. Cell lysates were prepared and subjected to immunoprecipitation (IP) with an anti-JNK2 antibody. The immunoprecipitates were resolved by SDS-PAGE and immunoblotted (IB) with anti-Gab1 antibody. Data courtesy of Dr. GS Feng at The Burnham Institute.

Rescue of the JNK pathway by expression of wild-type Gab1 in Gab1^{-/-} cells. Gab1^{-/-} cells were transiently transfected with 1, 2, or 4 of the expression construct for human Gab1 cDNA, using the GenePORTER 2 transfection reagent (Gene Therapy Systems Inc.). After incubation, the cells were irradiated with UV-B light at 400 J/m² or left untreated. Exogenous expression of Gab1 in transfected cells was confirmed by anti-Gab1 immunoblot analysis with wild-type cells as positive control. +/+, wild-type cells; -/-, Gab1^{-/-} cells. (Mol. Cell. Biol. 2004 Feb 15;24(4):1531-1539)

Gab1 Antibody (Ascites) - Background

The protein encoded by this gene is a member of the IRS1-like multisubstrate docking protein family. It is an important mediator of branching tubulogenesis and plays a central role in cellular growth response, transformation and apoptosis. Two transcript variants encoding different isoforms have been found for this gene.
