

**RAB14 Antibody**  
**Purified Mouse Monoclonal Antibody (Mab)**  
**Catalog # AM8601b****Specification**

---

**RAB14 Antibody - Product Information**

Application	WB,E
Primary Accession	<a href="#">P61106</a>
Other Accession	<a href="#">Q5ZKU5</a> , <a href="#">Q91V41</a> , <a href="#">Q5R8Z8</a>
Reactivity	Human
Predicted	Chicken, Mouse
Host	Mouse
Clonality	monoclonal
Isotype	IgG1,k
Calculated MW	23897

**RAB14 Antibody - Additional Information****Gene ID** 51552**Other Names**

Ras-related protein Rab-14, RAB14

**Target/Specificity**

This RAB14 antibody is generated from a mouse immunized with a recombinant protein of human RAB14.

**Dilution**

WB~~1:2000

**Format**

Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, followed by dialysis against PBS.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

RAB14 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**RAB14 Antibody - Protein Information****Name** RAB14 ([HGNC:16524](#))

**Function** The small GTPases Rab are key regulators of intracellular membrane trafficking, from the formation of transport vesicles to their fusion with membranes. Rabs cycle between an inactive GDP-bound form and an active GTP-bound form that is able to recruit to membranes

different set of downstream effectors directly responsible for vesicle formation, movement, tethering and fusion (PubMed:[22595670](#)). Involved in membrane trafficking between the Golgi complex and endosomes during early embryonic development (By similarity). Regulates the Golgi to endosome transport of FGFR-containing vesicles during early development, a key process for developing basement membrane and epiblast and primitive endoderm lineages during early postimplantation development. May act by modulating the kinesin KIF16B-cargo association to endosomes (By similarity). Regulates, together with its guanine nucleotide exchange factor DENND6A, the specific endocytic transport of ADAM10, N-cadherin/CDH2 shedding and cell-cell adhesion (PubMed:[22595670](#)). Mediates endosomal tethering and fusion through the interaction with RUFY1 and RAB4B (PubMed:[20534812](#)).

### Cellular Location

Recycling endosome. Early endosome membrane; Lipid-anchor; Cytoplasmic side. Golgi apparatus membrane; Lipid-anchor; Cytoplasmic side. Golgi apparatus, trans-Golgi network membrane; Lipid-anchor; Cytoplasmic side. Cytoplasmic vesicle, phagosome. Note=Recruited to recycling endosomes by DENND6A (PubMed:22595670). Recruited to phagosomes containing S.aureus or M.tuberculosis (PubMed:21255211).

### RAB14 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
