

**HK2 (Hexokinase II) Antibody**  
**Purified Mouse Monoclonal Antibody (Mab)**  
**Catalog # AM8606b**

**Specification**

---

**HK2 (Hexokinase II) Antibody - Product Information**

Application	IHC, WB,E
Primary Accession	<a href="#">P52789</a>
Reactivity	Human
Host	Mouse
Clonality	monoclonal
Isotype	IgG1,k
Calculated MW	102380

**HK2 (Hexokinase II) Antibody - Additional Information**

**Gene ID** 3099

**Other Names**

Hexokinase-2, 2.7.1.1, Hexokinase type II, HK II, Muscle form hexokinase, HK2

**Target/Specificity**

This HK2 (Hexokinase II) antibody is generated from a mouse immunized with a recombinant protein between 1-170 amino acids from human HK2 (Hexokinase II).

**Dilution**

IHC~~1:400  
WB~~1:500-1:1000

**Format**

Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, followed by dialysis against PBS.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

HK2 (Hexokinase II) Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**HK2 (Hexokinase II) Antibody - Protein Information**

**Name** HK2 ([HGNC:4923](#))

**Function** Catalyzes the phosphorylation of hexose, such as D-glucose and D-fructose, to hexose 6-phosphate (D-glucose 6-phosphate and D-fructose 6-phosphate, respectively) (PubMed:[23185017](#), PubMed:[26985301](#), PubMed:[29298880](#)). Mediates the initial step of glycolysis

by catalyzing phosphorylation of D-glucose to D-glucose 6-phosphate (PubMed:[29298880](#)). Plays a key role in maintaining the integrity of the outer mitochondrial membrane by preventing the release of apoptogenic molecules from the intermembrane space and subsequent apoptosis (PubMed:[18350175](#)).

#### Cellular Location

Mitochondrion outer membrane; Peripheral membrane protein. Cytoplasm, cytosol Note=The mitochondrial-binding peptide (MBP) region promotes association with the mitochondrial outer membrane (PubMed:29298880) The interaction with the mitochondrial outer membrane via the mitochondrial-binding peptide (MBP) region promotes higher stability of the protein (PubMed:29298880). Release from the mitochondrial outer membrane into the cytosol induces permeability transition pore (PTP) opening and apoptosis (PubMed:18350175).

#### Tissue Location

Predominant hexokinase isozyme expressed in insulin-responsive tissues such as skeletal muscle

### HK2 (Hexokinase II) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

### HK2 (Hexokinase II) Antibody - Images

Immunohistochemical analysis of paraffin-embedded Human Skeletal muscle section using Pink1(Cat#AM8606b). AM8606b was diluted at 1:400 dilution. A undiluted biotinylated goat polyvalent antibody was used as the secondary, followed by DAB staining.

All lanes : Anti-HK2 (Hexokinase II) Antibody at 1:500-1:1000 dilution Lane 1: HeLa whole cell lysate Lane 2: 293 whole cell lysate Lane 3: Jurkat whole cell lysate Lysates/proteins at 20 µg per lane. Secondary Goat Anti-mouse IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 102 kDa Blocking/Dilution buffer: 5% NFDM/TBST.
