

**TSG101 Antibody**  
**Purified Mouse Monoclonal Antibody (Mab)**  
**Catalog # AM8662b**

**Specification**

---

**TSG101 Antibody - Product Information**

Application	WB,E
Primary Accession	<a href="#">O99816</a>
Reactivity	Human
Host	Mouse
Clonality	monoclonal
Isotype	IgG1, $\kappa$

**TSG101 Antibody - Additional Information**

**Gene ID** 7251

**Other Names**

Tumor susceptibility gene 101 protein, ESCRT-I complex subunit TSG101, TSG101

**Target/Specificity**

This antibody is generated from a mouse immunized with a recombinant protein from human.

**Dilution**

WB~~1:2000

**Format**

Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, followed by dialysis against PBS.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

TSG101 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**TSG101 Antibody - Protein Information**

**Name** TSG101

**Function** Component of the ESCRT-I complex, a regulator of vesicular trafficking process. Binds to ubiquitinated cargo proteins and is required for the sorting of endocytic ubiquitinated cargos into multivesicular bodies (MVBs). Mediates the association between the ESCRT-0 and ESCRT-I complex. Required for completion of cytokinesis; the function requires CEP55. May be involved in cell growth and differentiation. Acts as a negative growth regulator. Involved in the budding of many viruses through an interaction with viral proteins that contain a late-budding motif P-[ST]-A-P. This interaction is essential for viral particle budding of numerous retroviruses.

Required for the exosomal release of SDCBP, CD63 and syndecan (PubMed:[22660413](#)). It may also play a role in the extracellular release of microvesicles that differ from the exosomes (PubMed:[22315426](#)).

#### Cellular Location

Cytoplasm. Early endosome membrane; Peripheral membrane protein; Cytoplasmic side. Late endosome membrane; Peripheral membrane protein. Cytoplasm, cytoskeleton, microtubule organizing center, centrosome. Midbody, Midbody ring. Nucleus. Note=Mainly cytoplasmic. Membrane-associated when active and soluble when inactive. Nuclear localization is cell cycle-dependent. Interaction with CEP55 is required for localization to the midbody during cytokinesis

#### Tissue Location

Heart, brain, placenta, lung, liver, skeletal, kidney and pancreas

### TSG101 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
